Add / edit	Behaviors

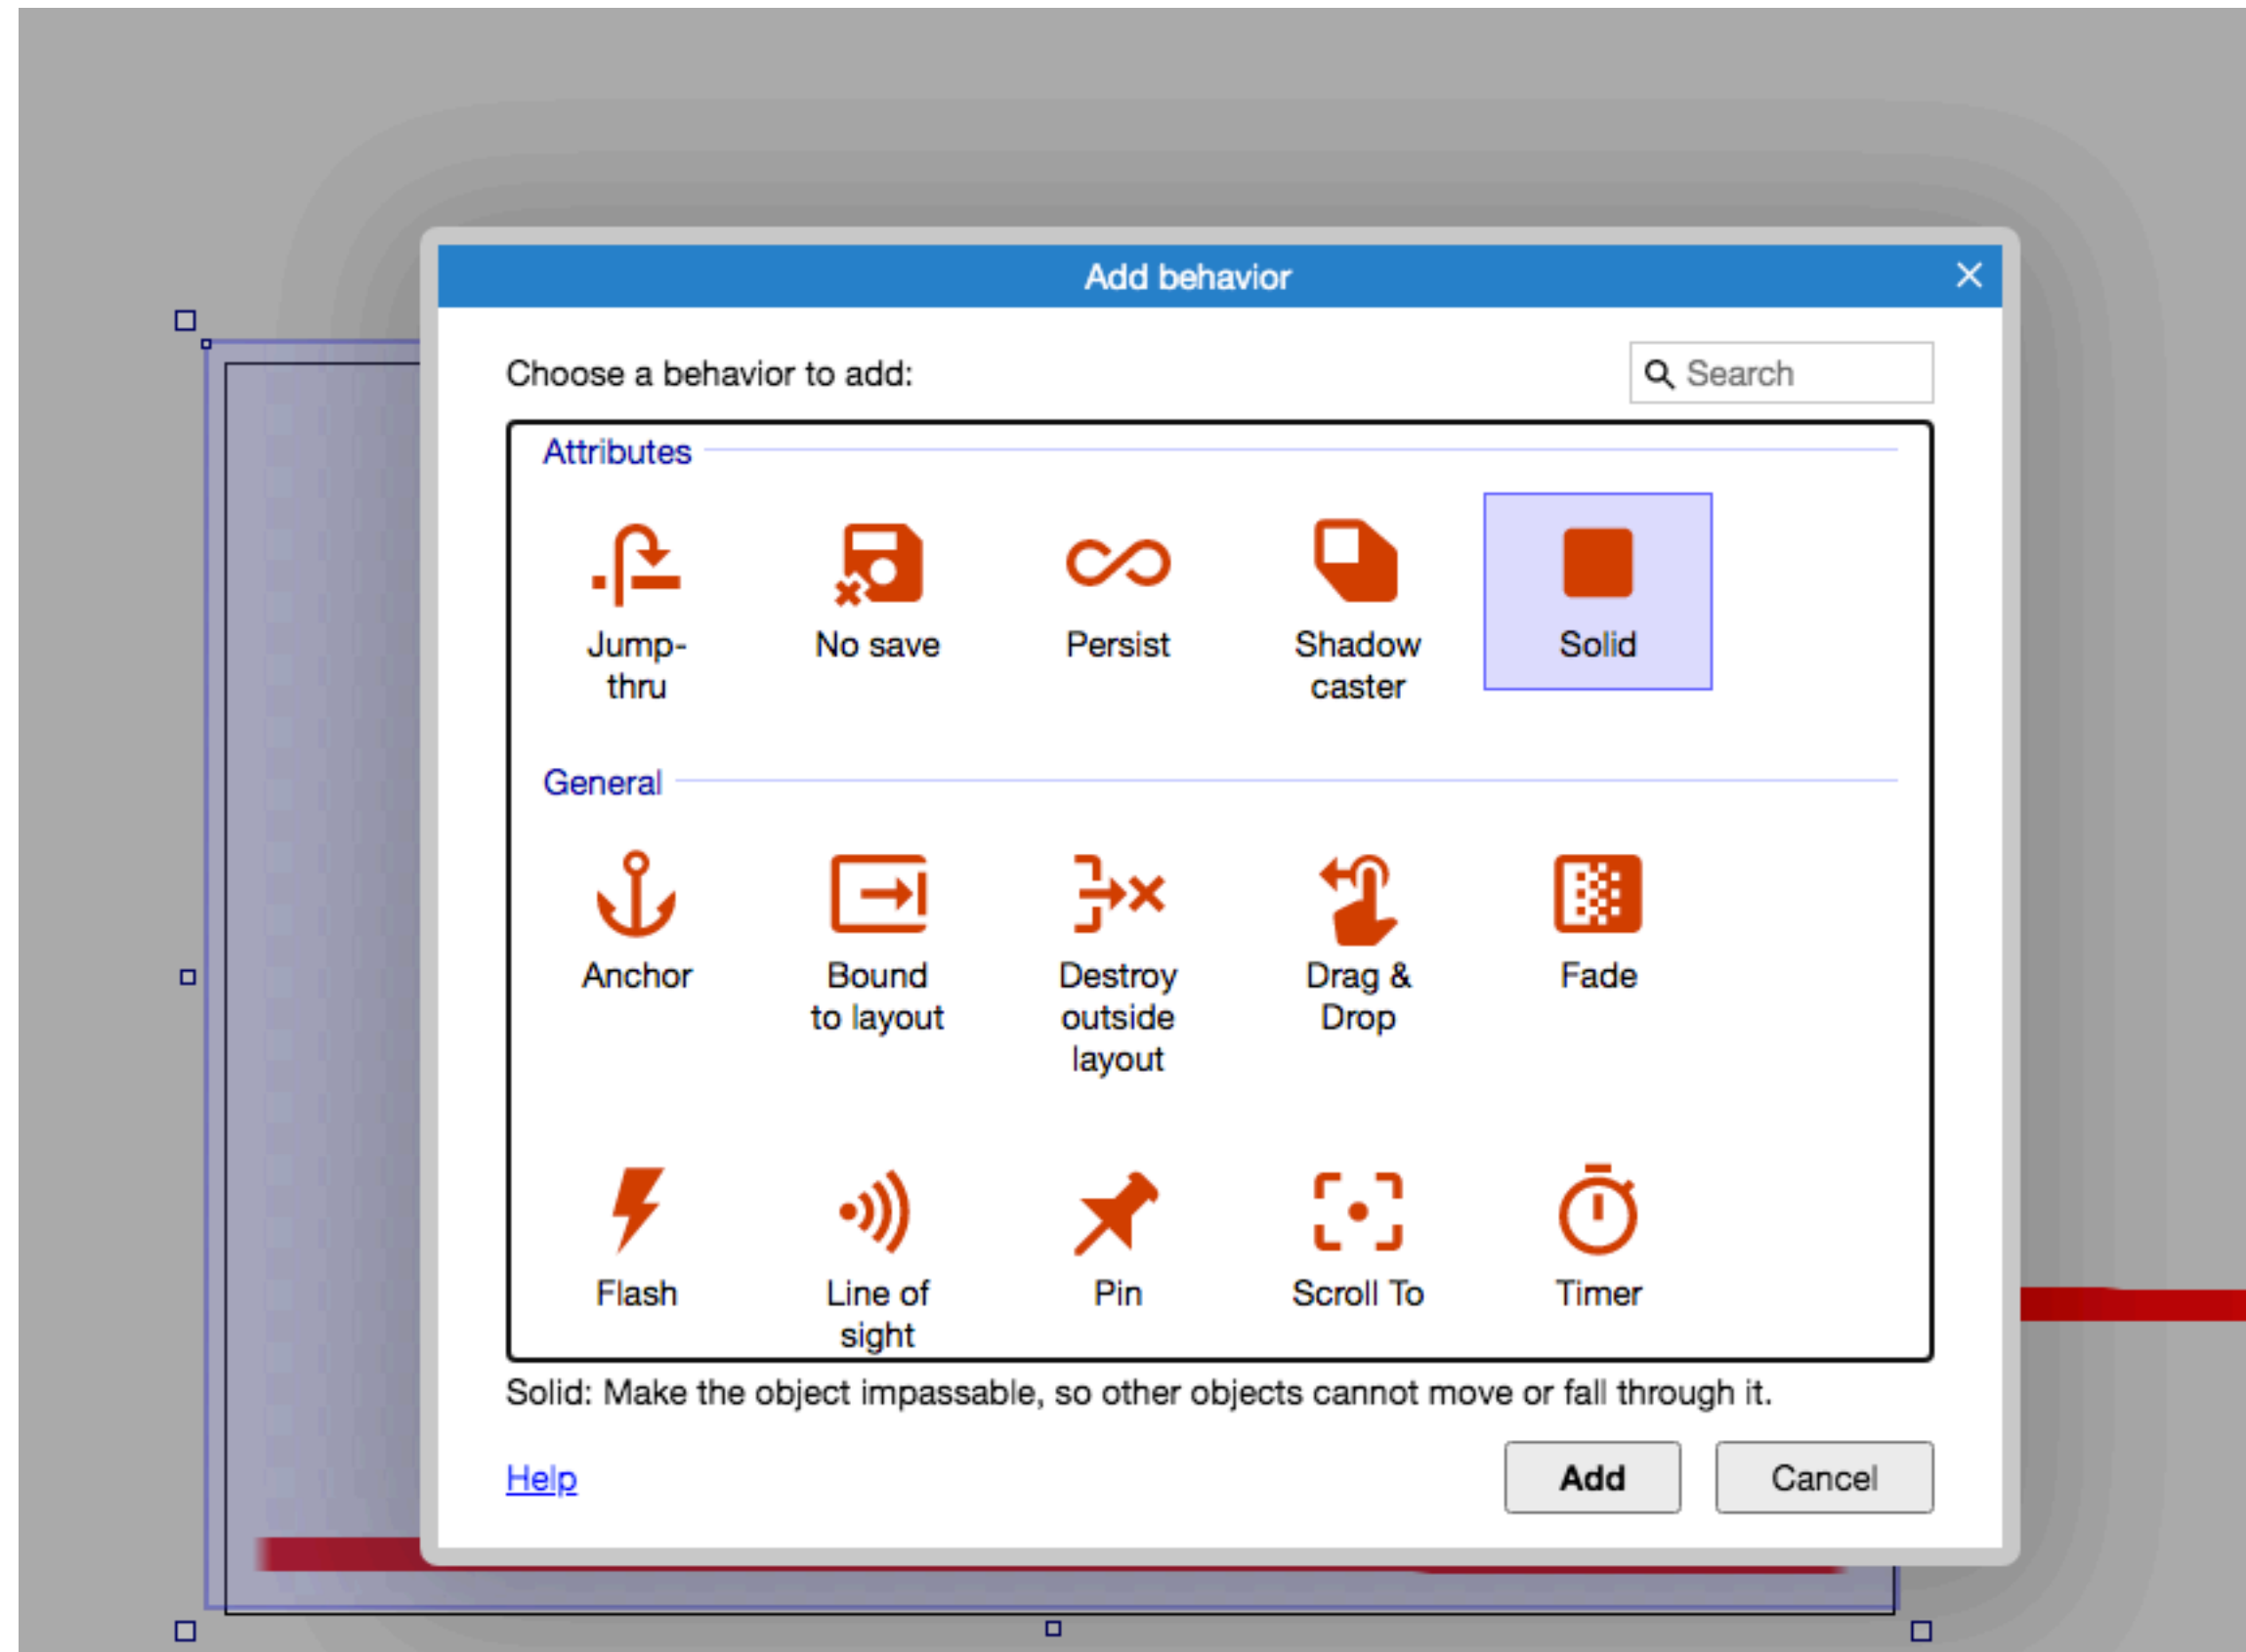

- right click player sprite
- Add-> Behavior

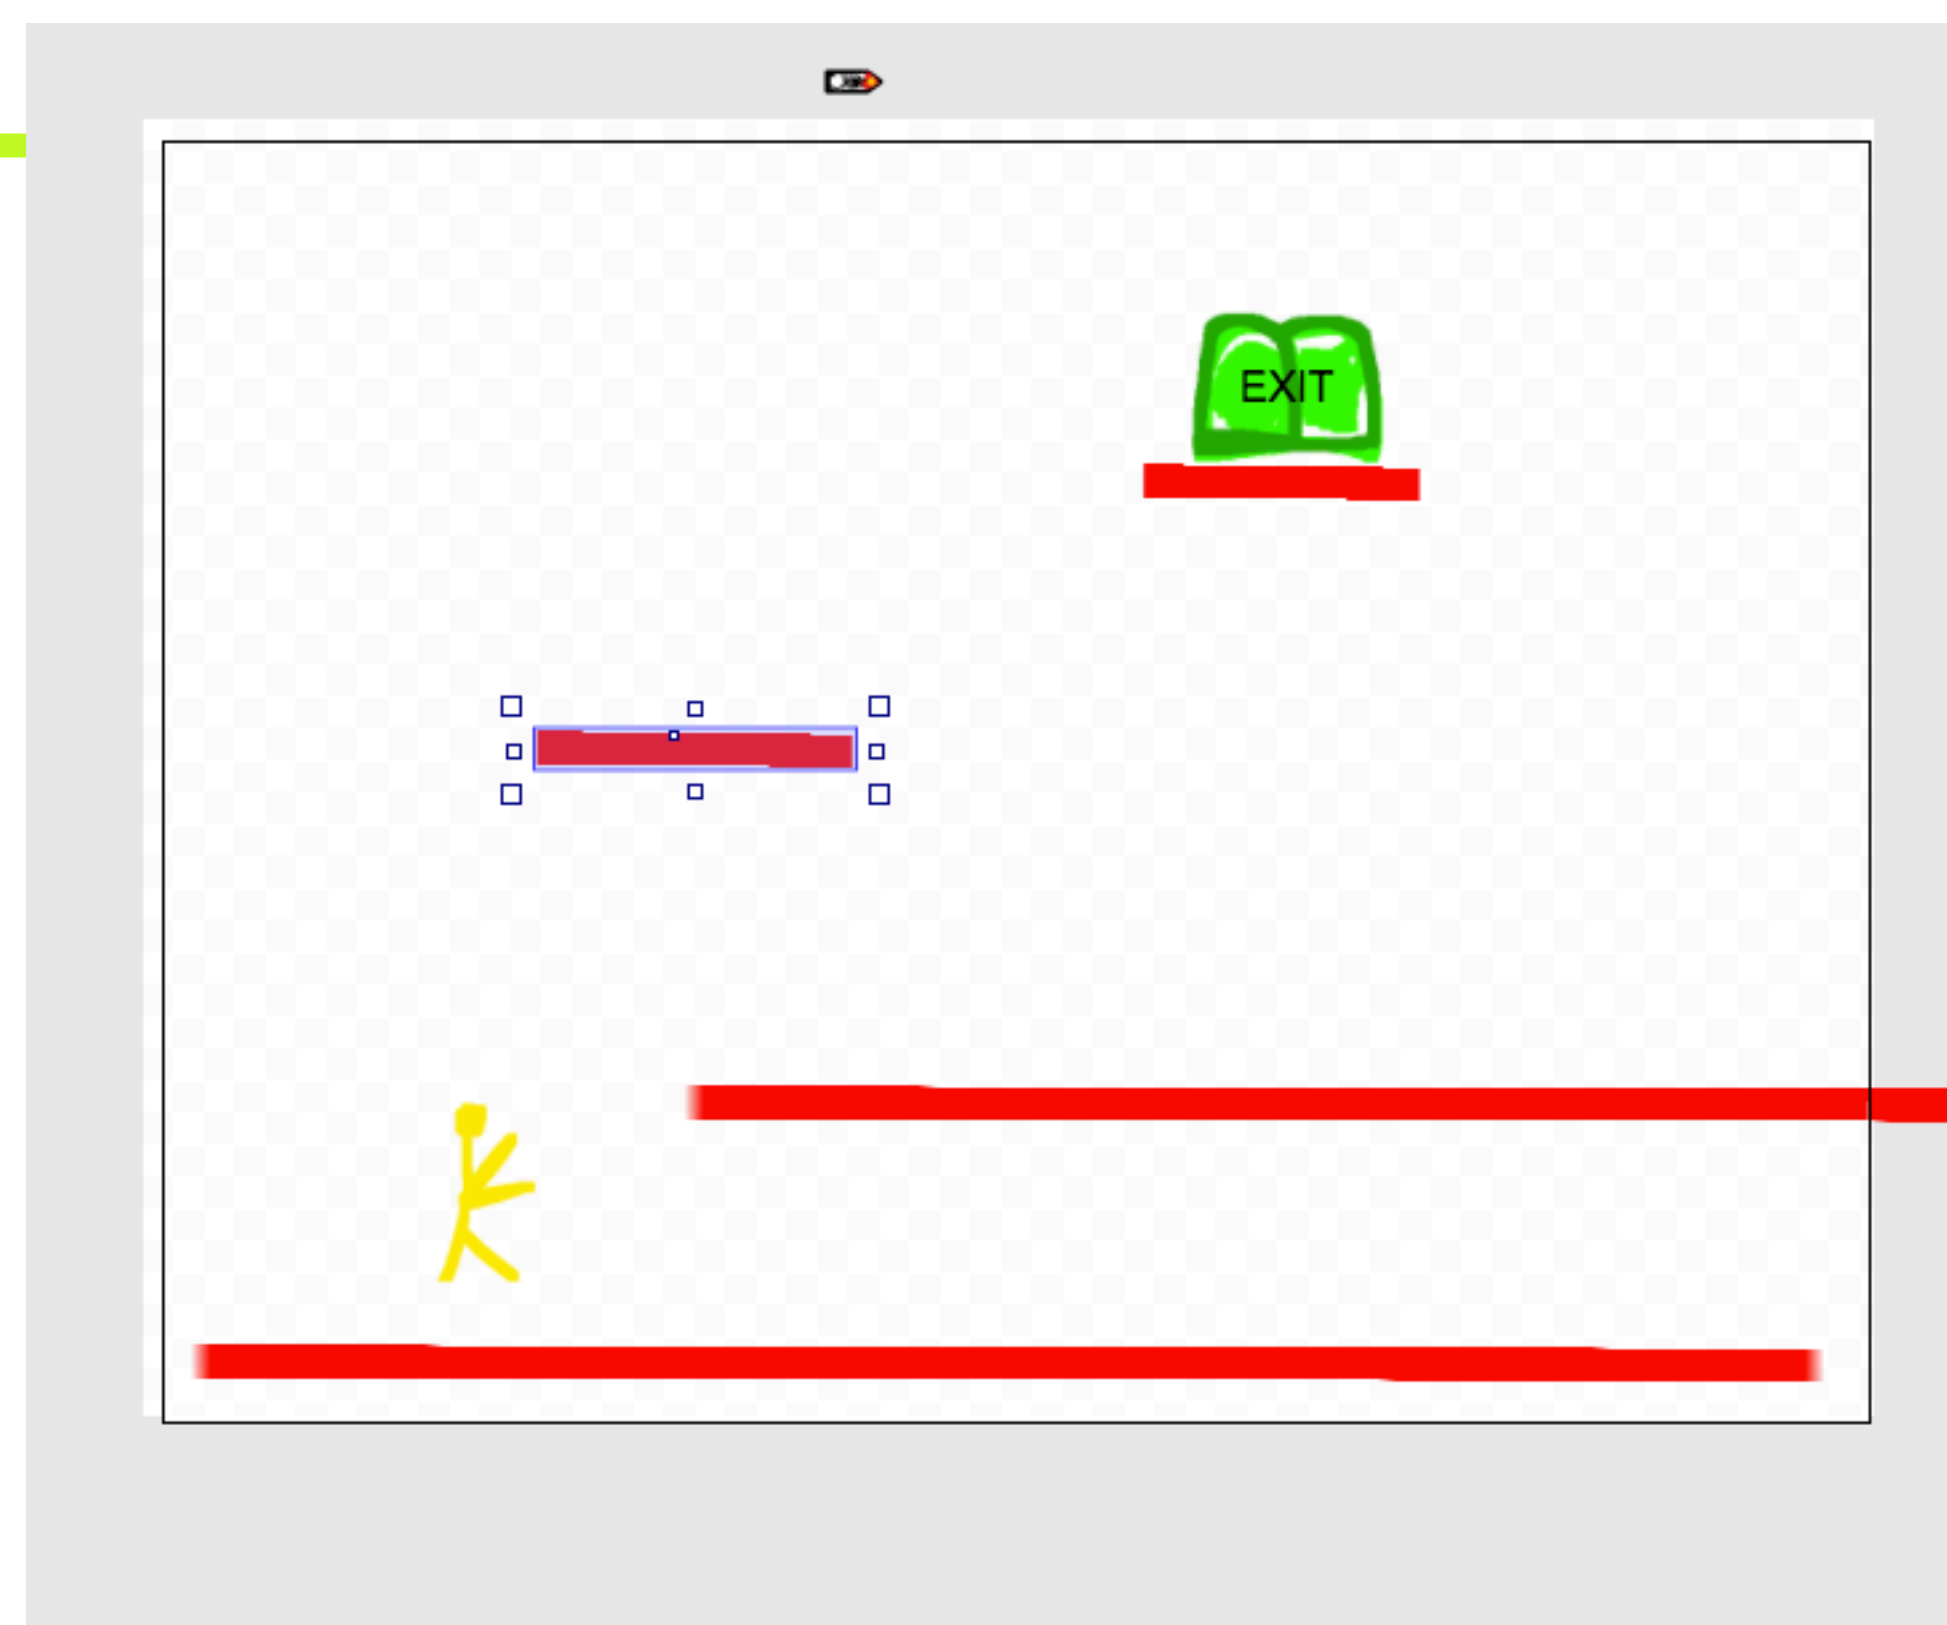

- right click red box
- Add-> Behavior

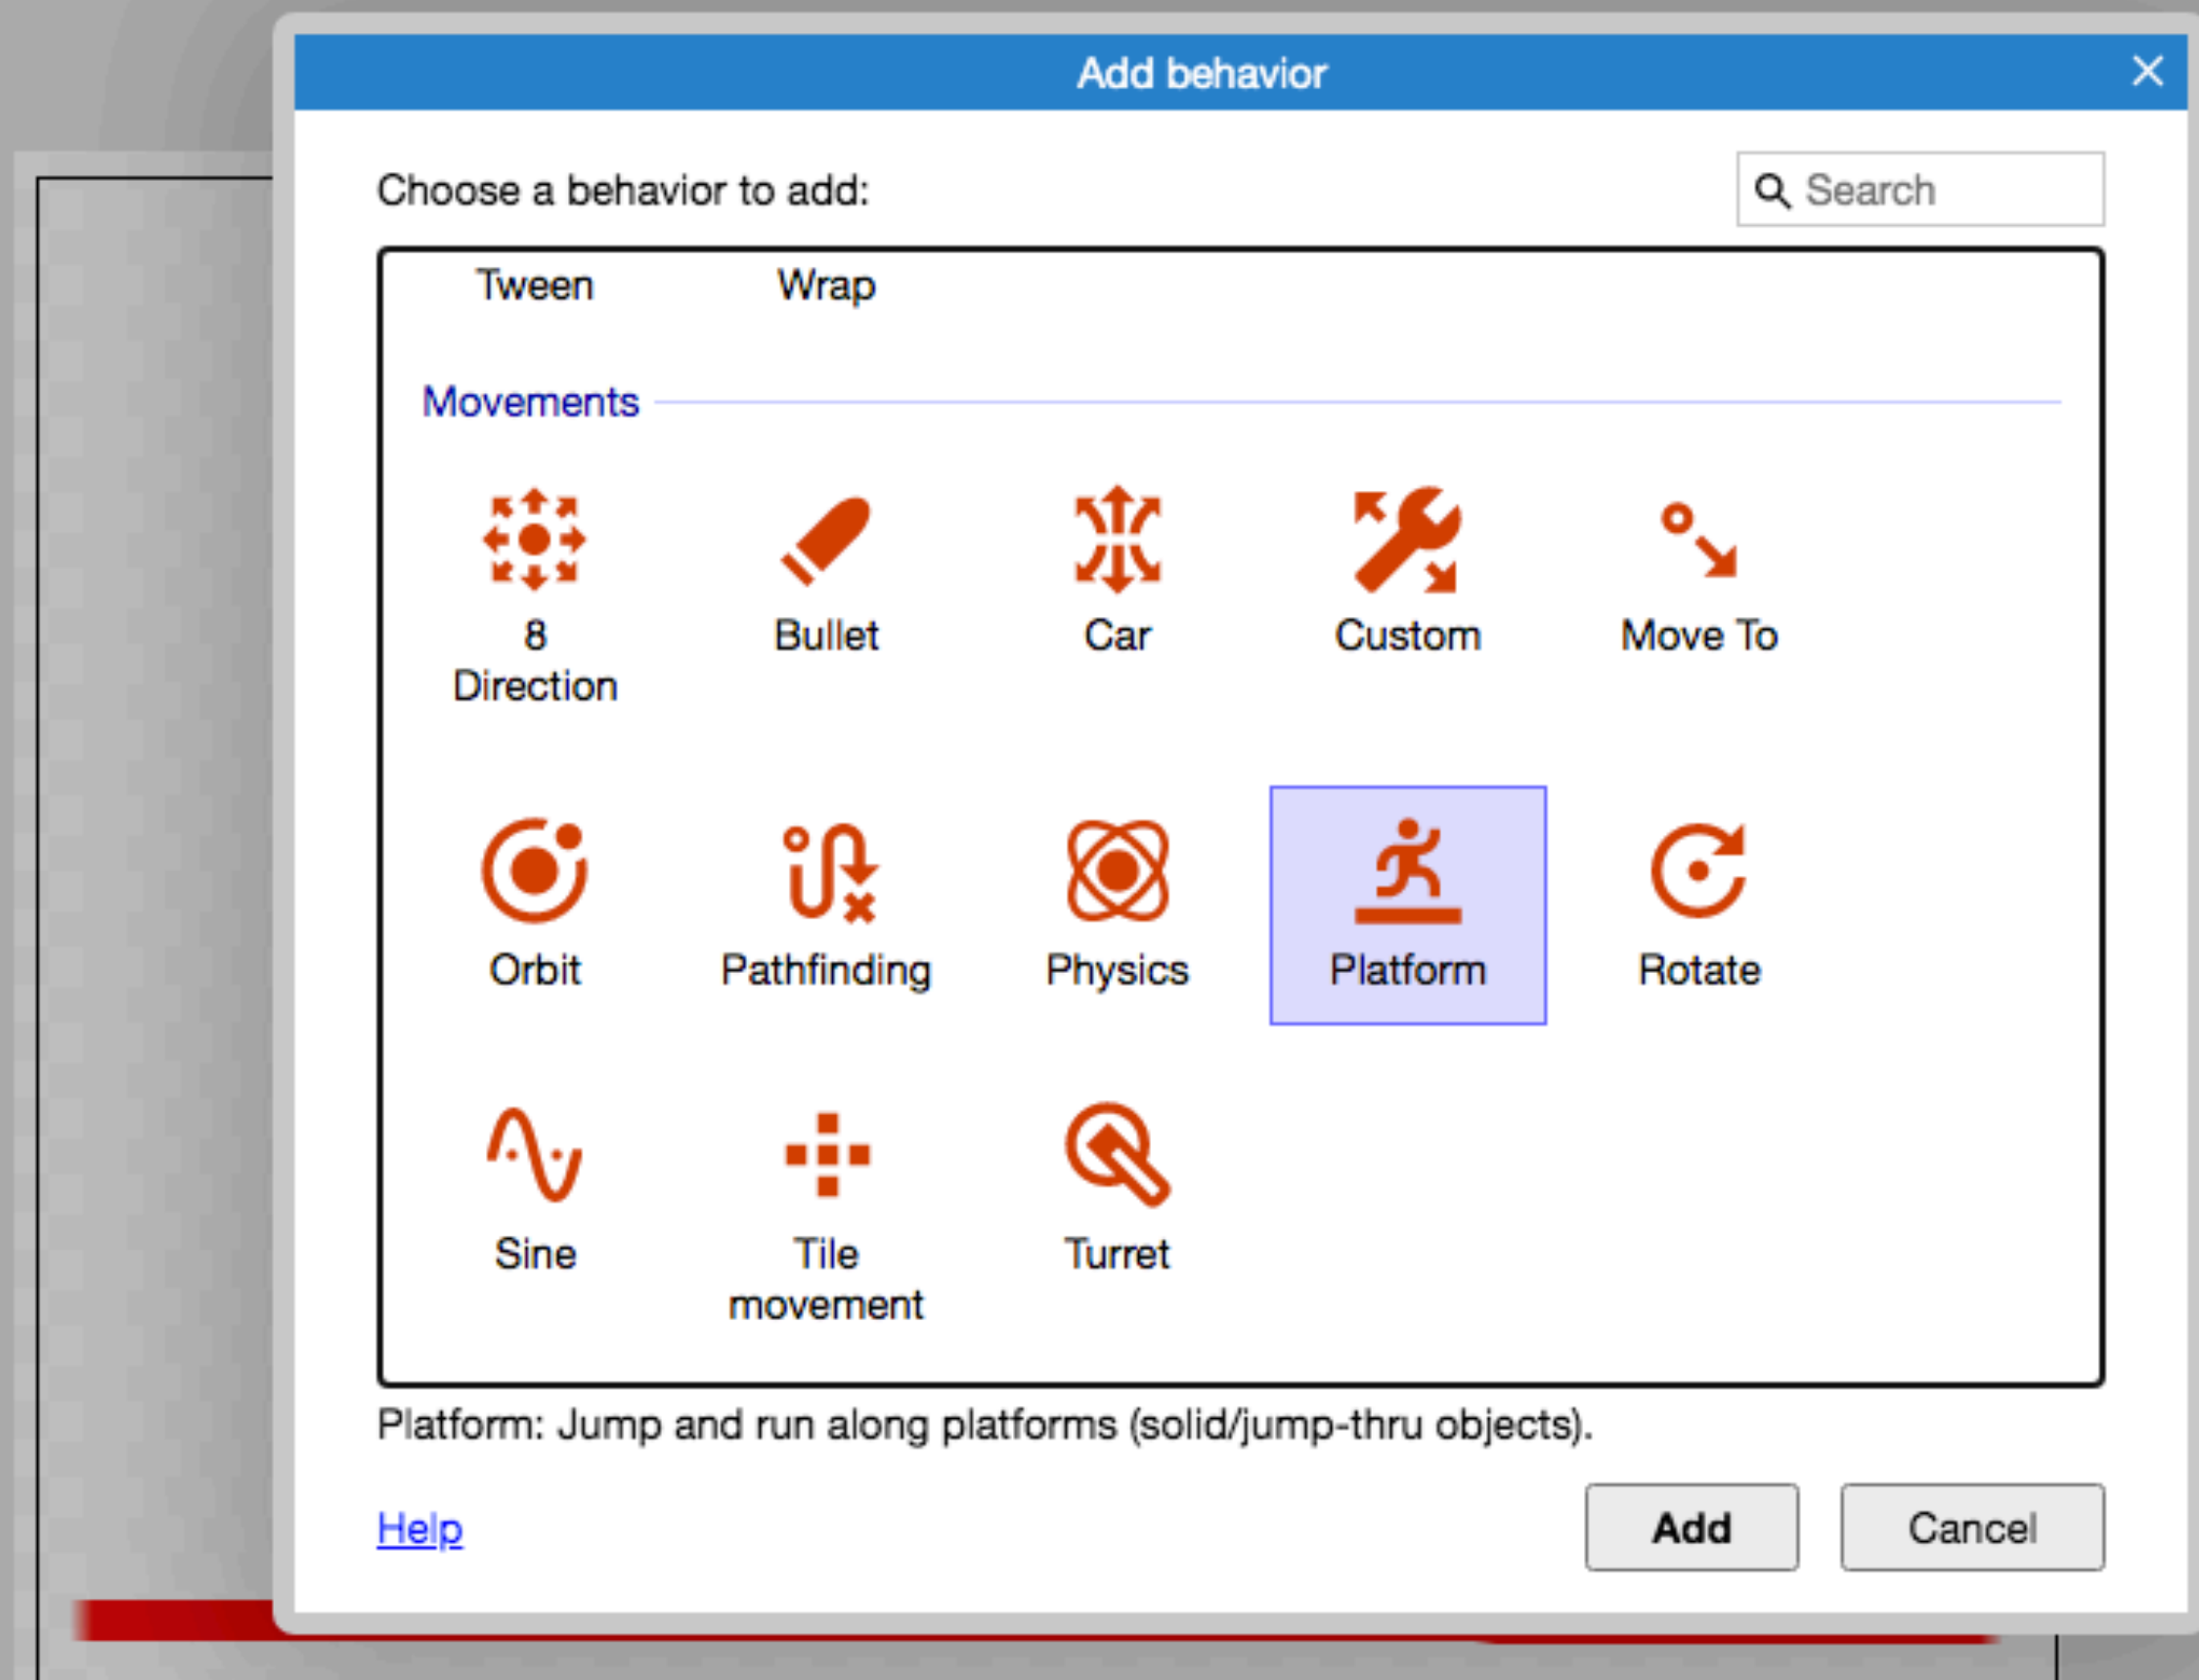

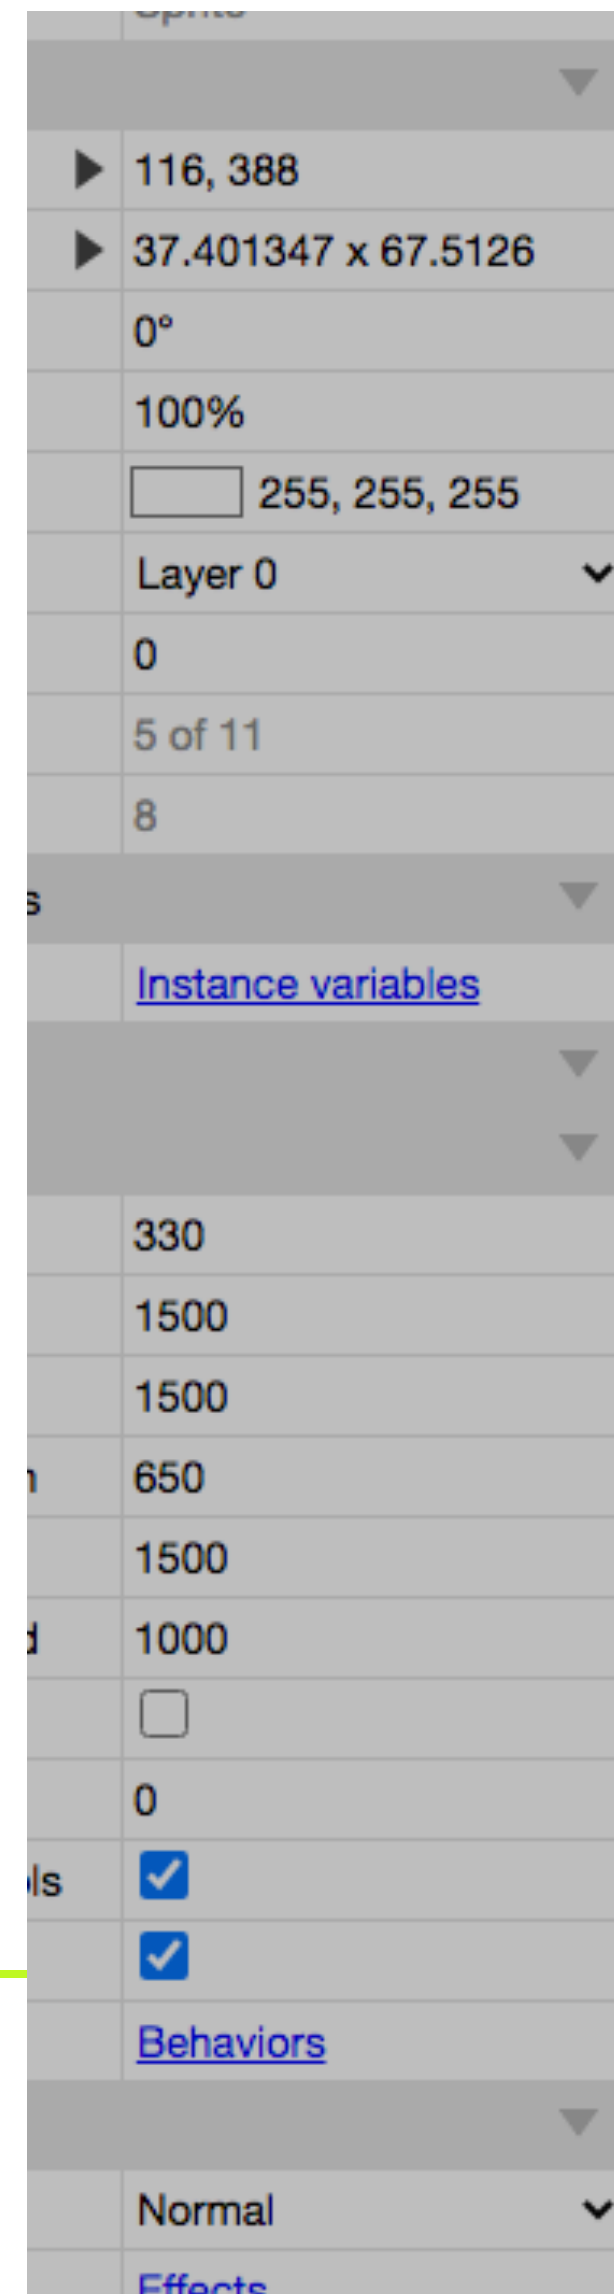

- Solid

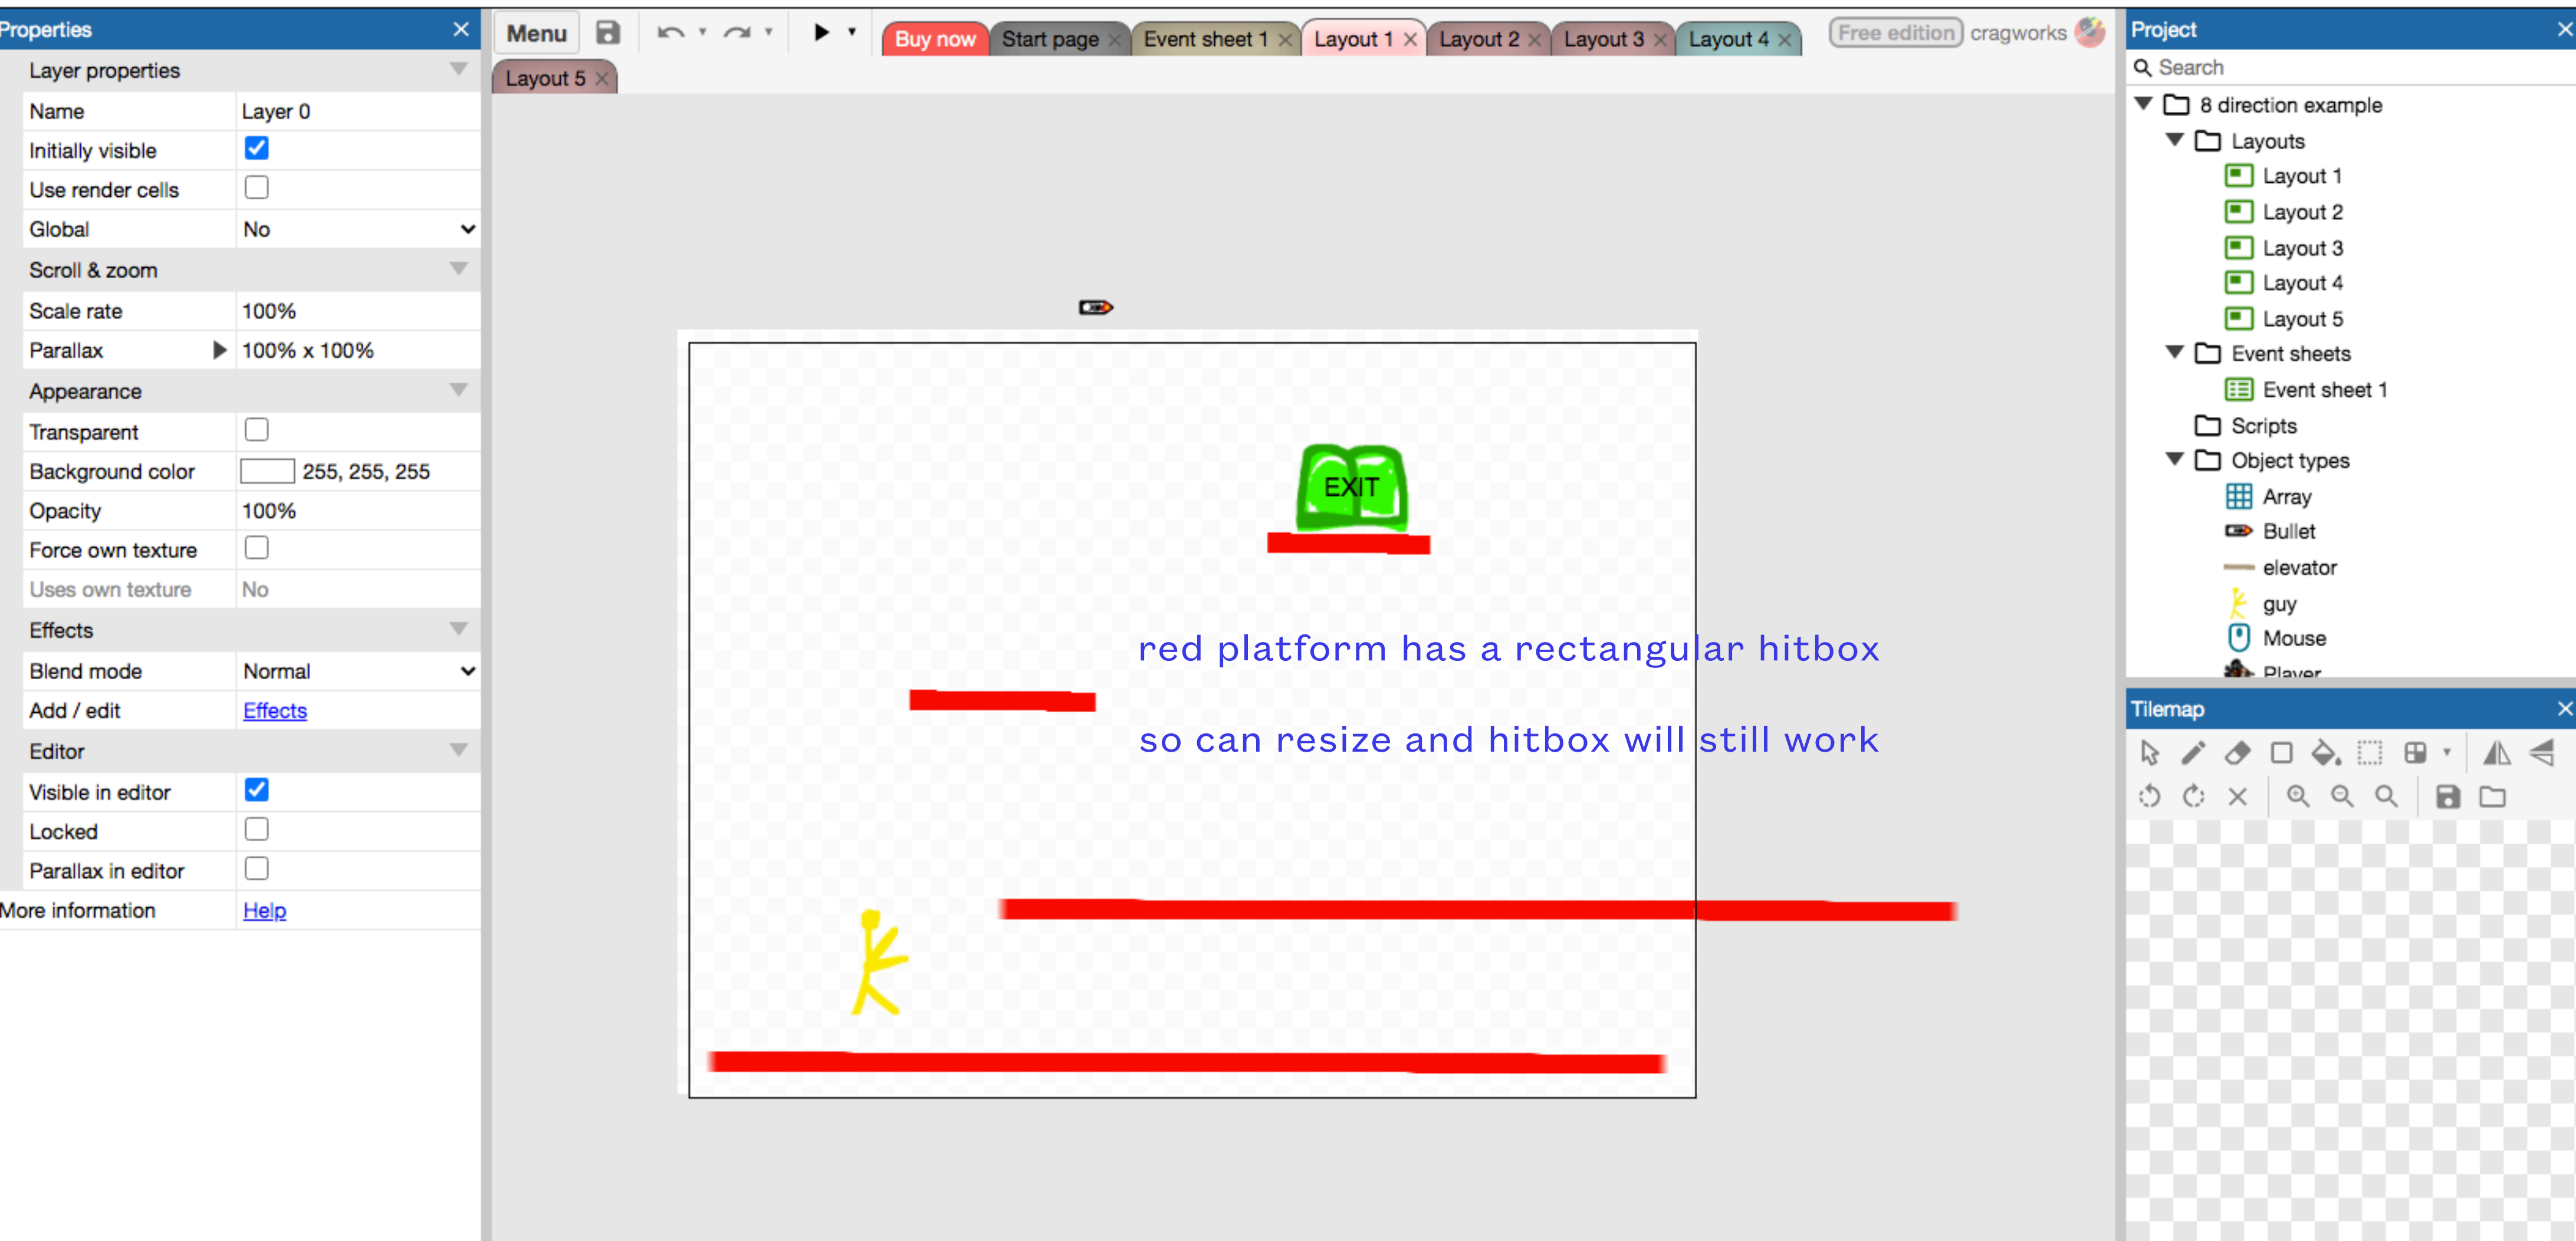

- now player can stand on the red box
- instead of falling through it

- choose platform

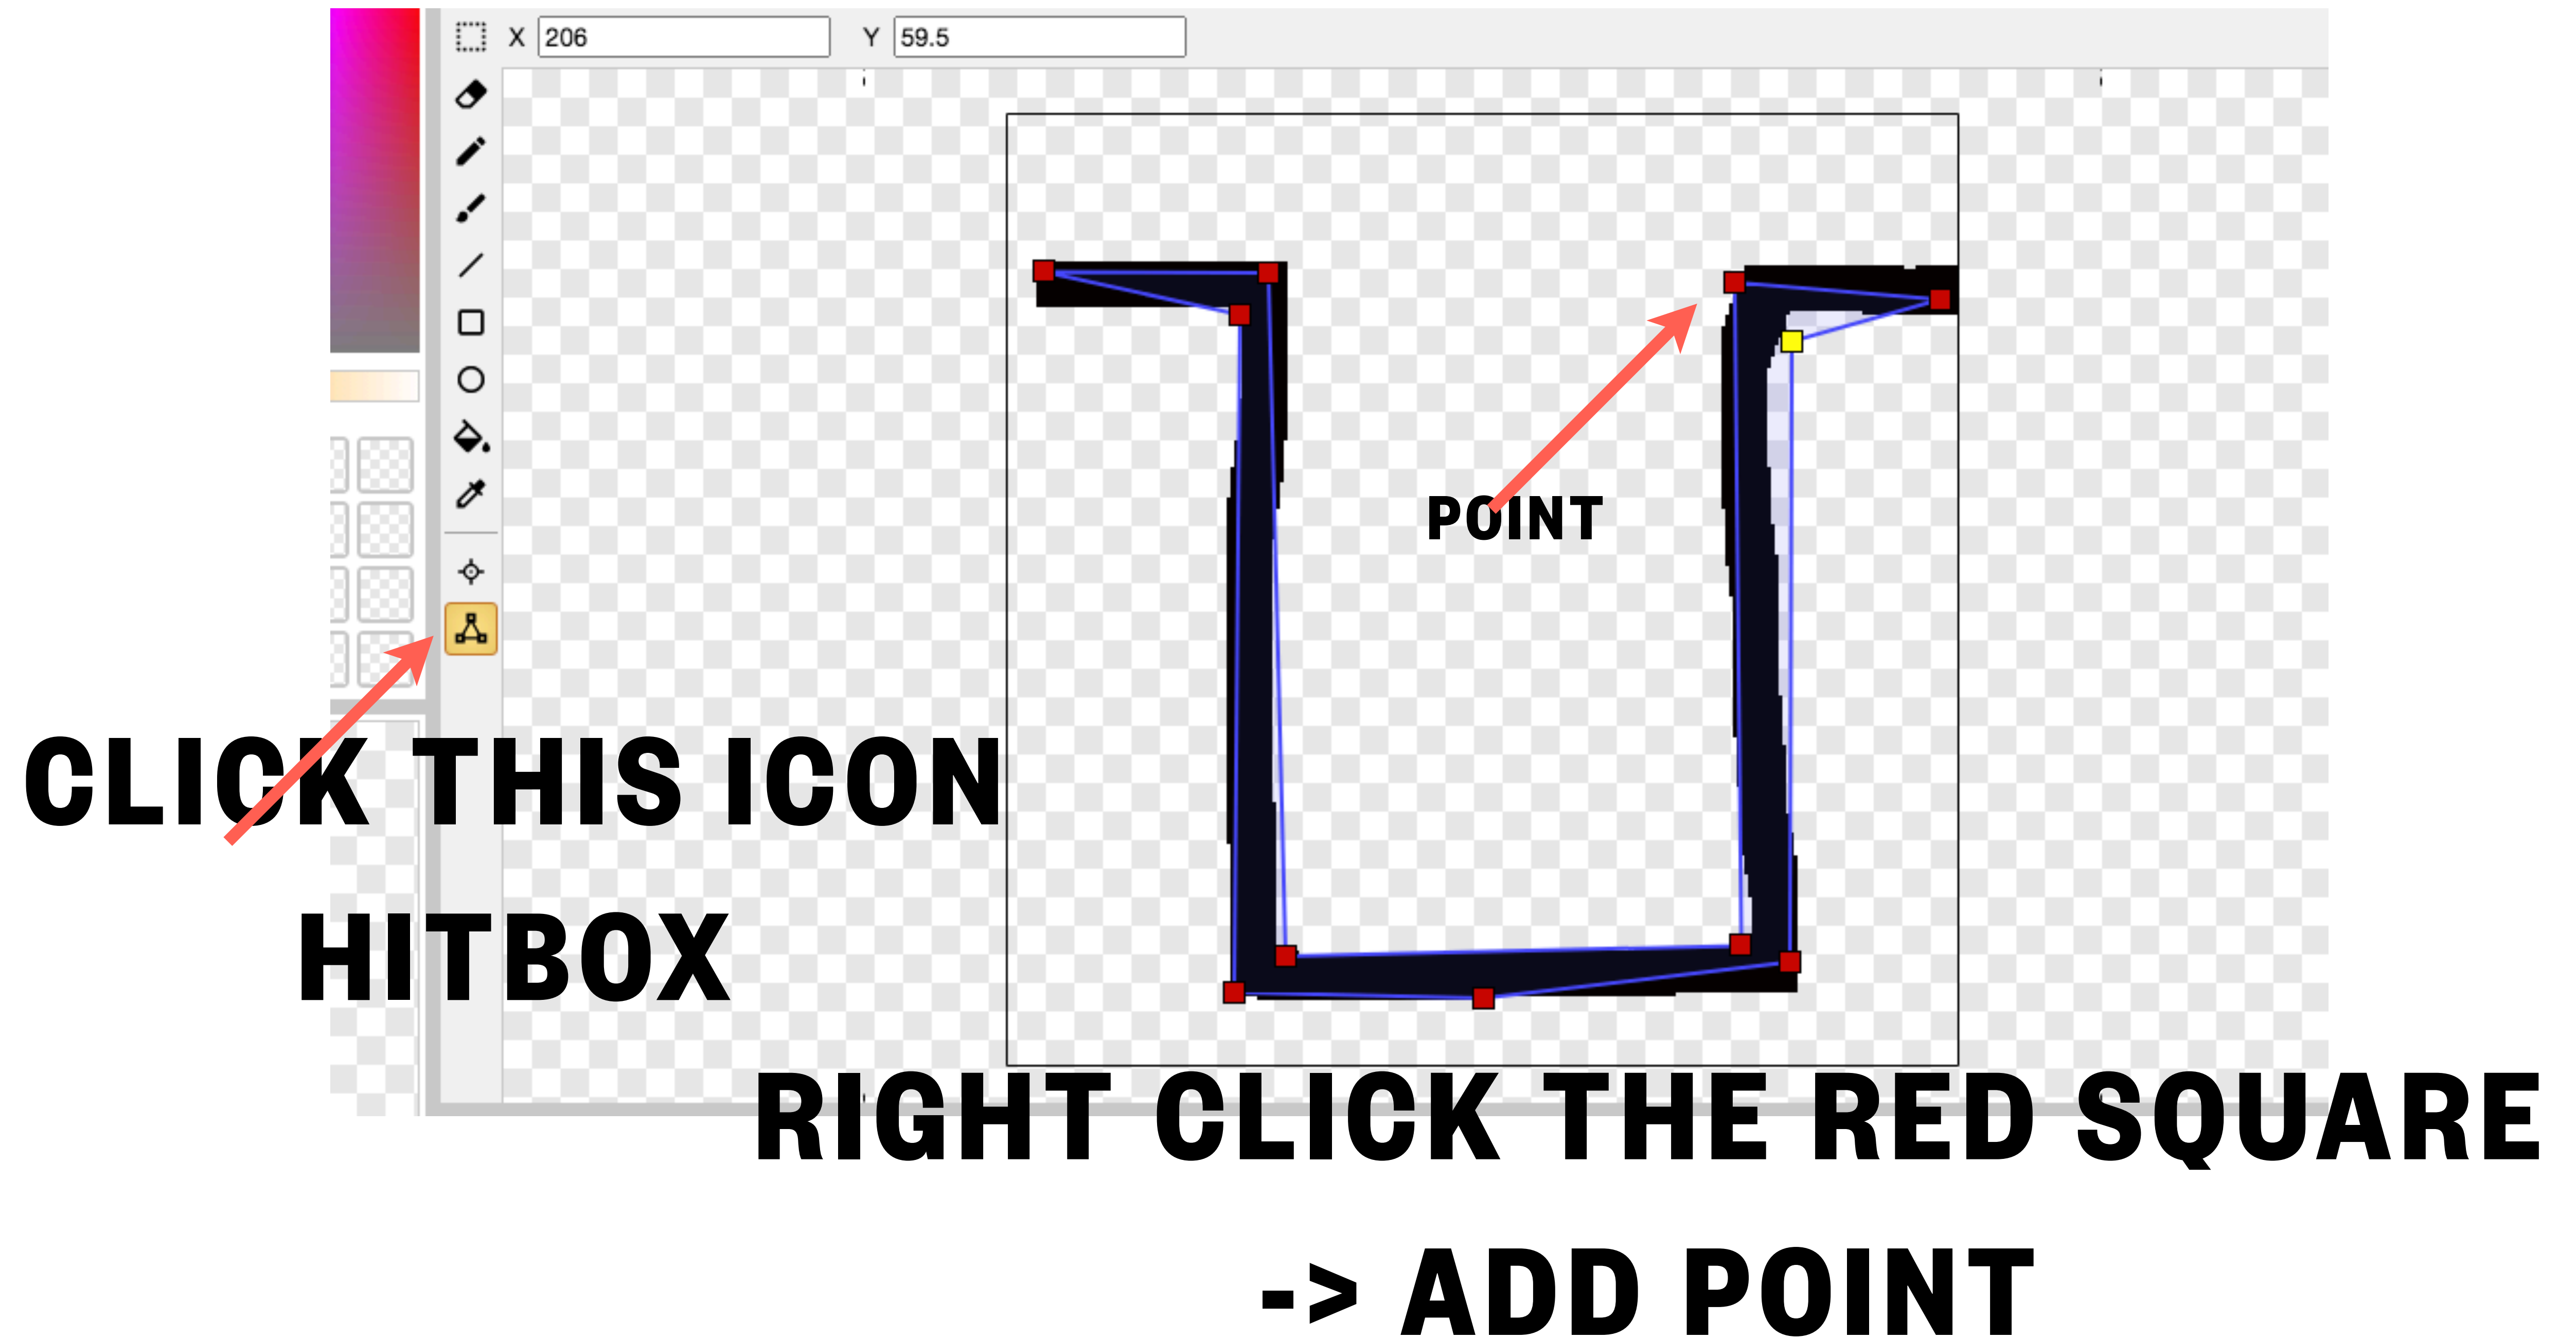

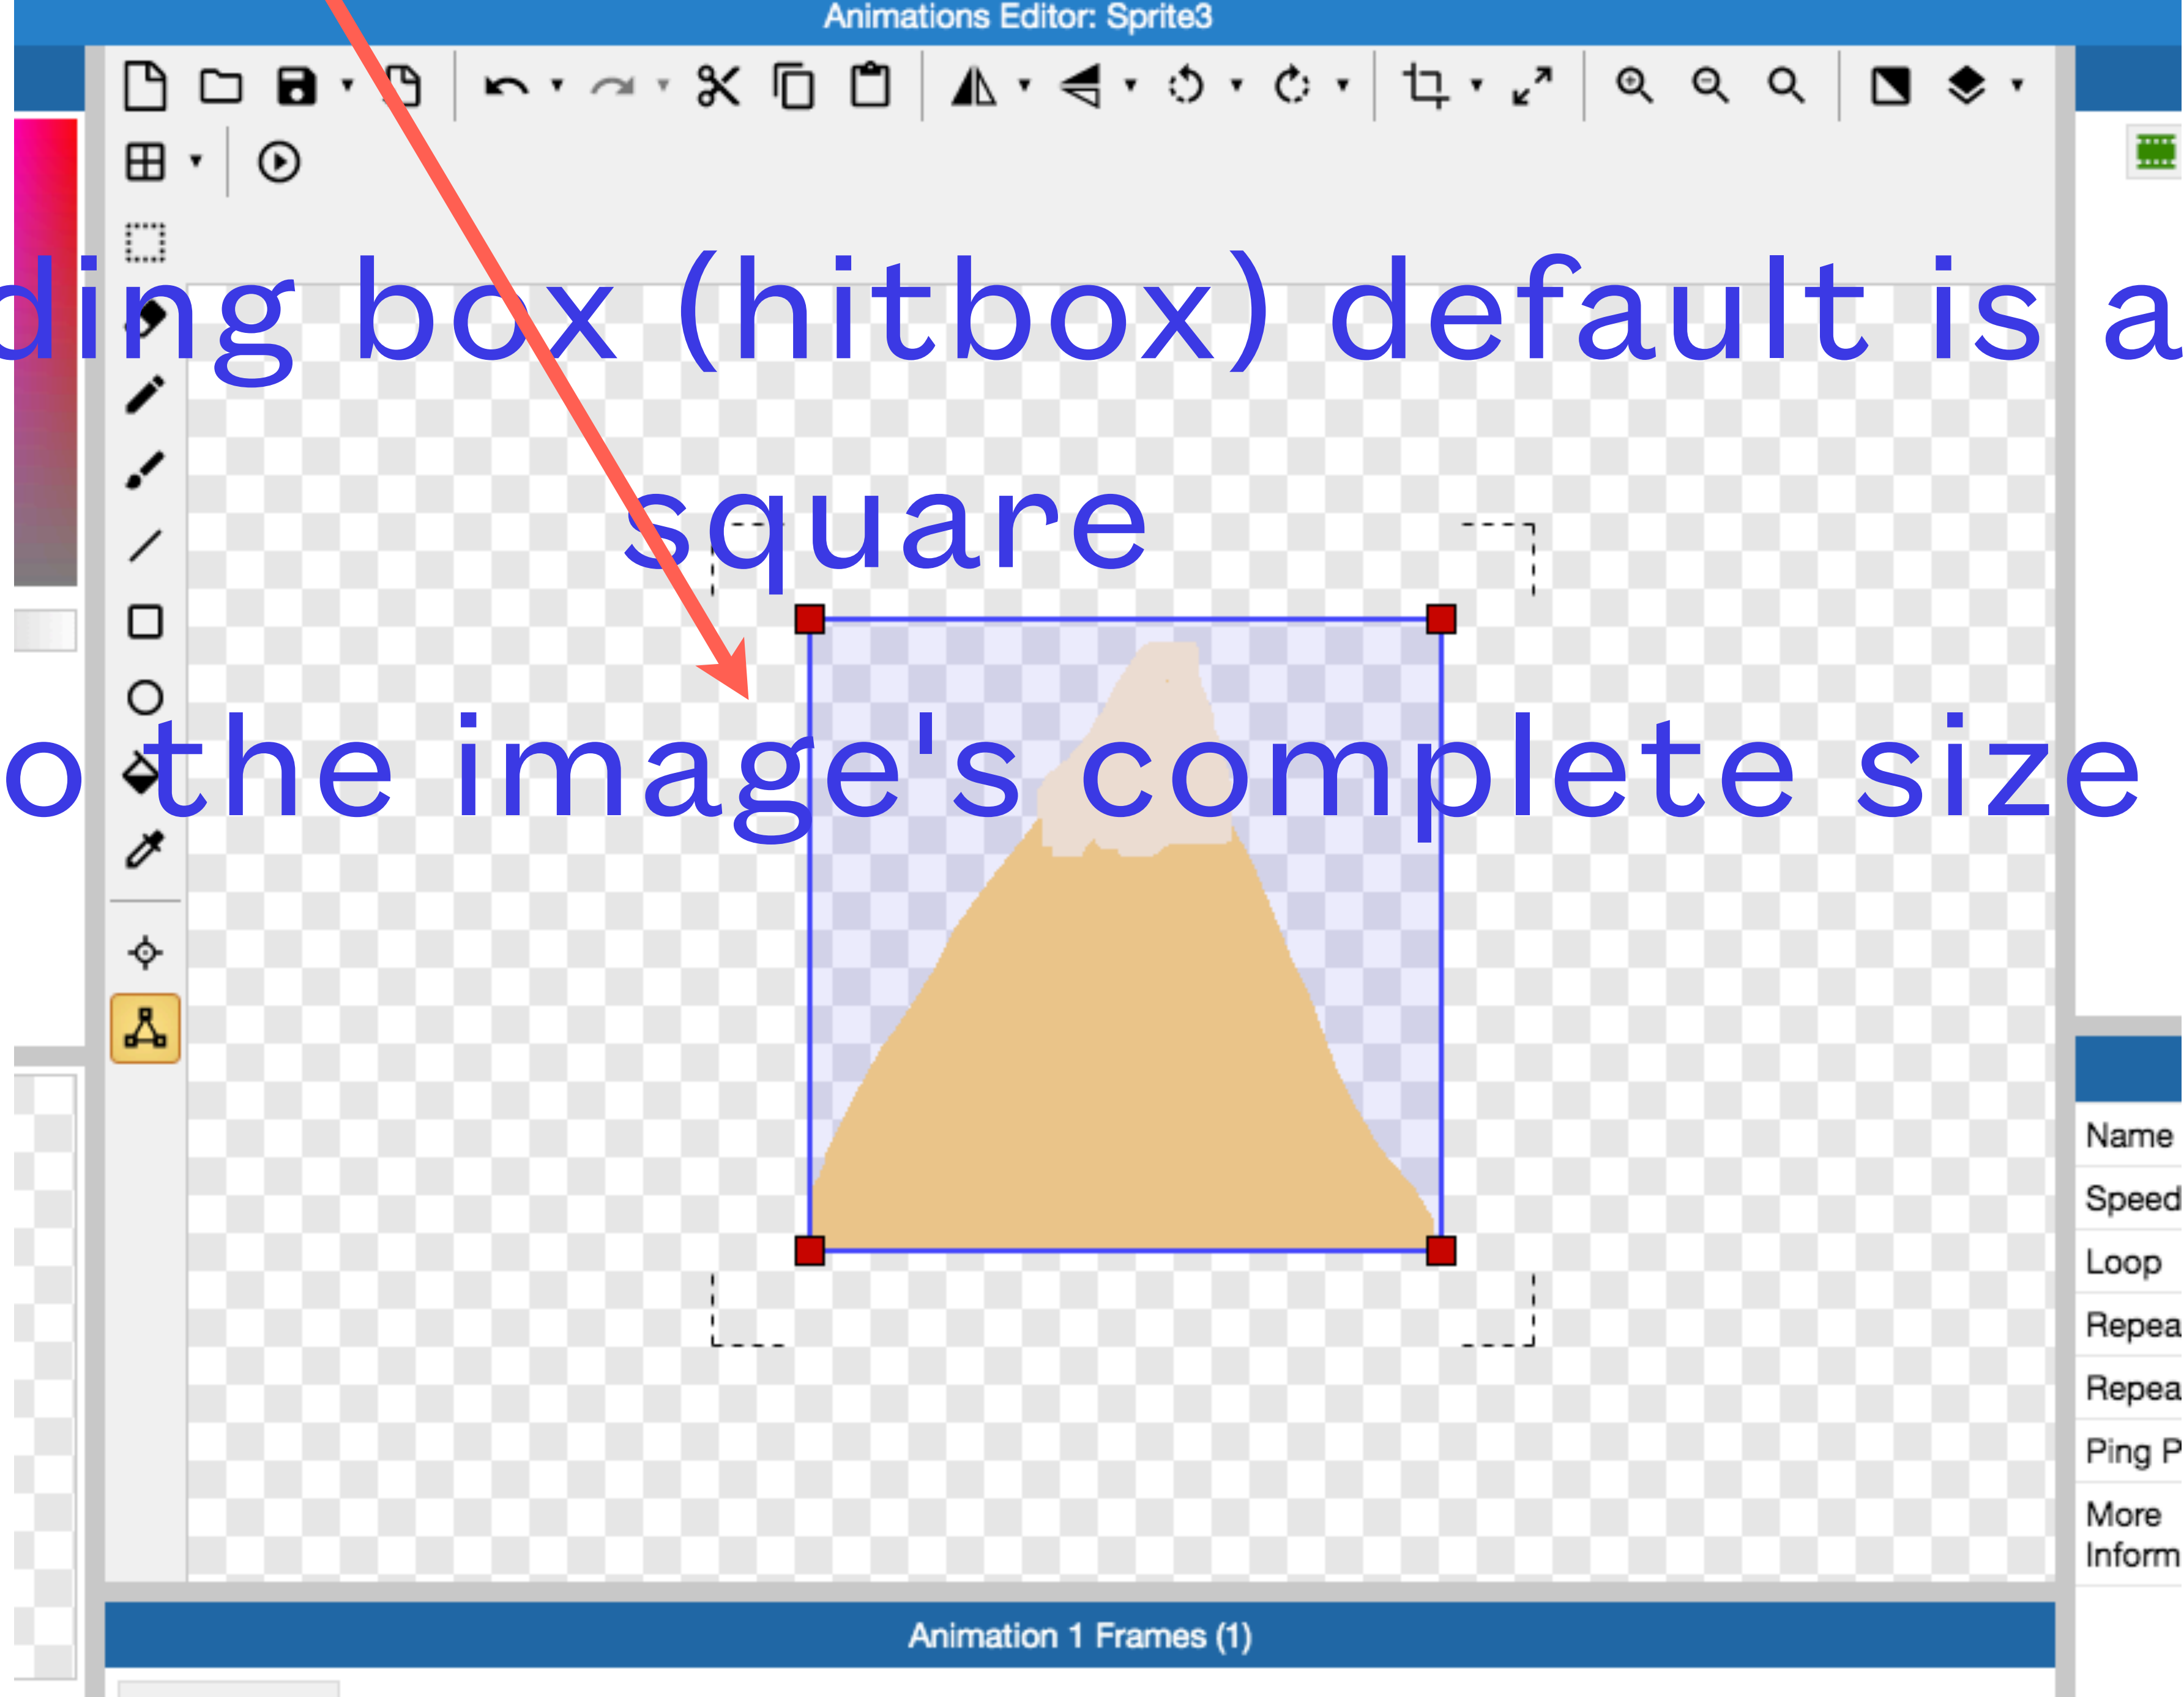

to change hitbox:
double click sprite

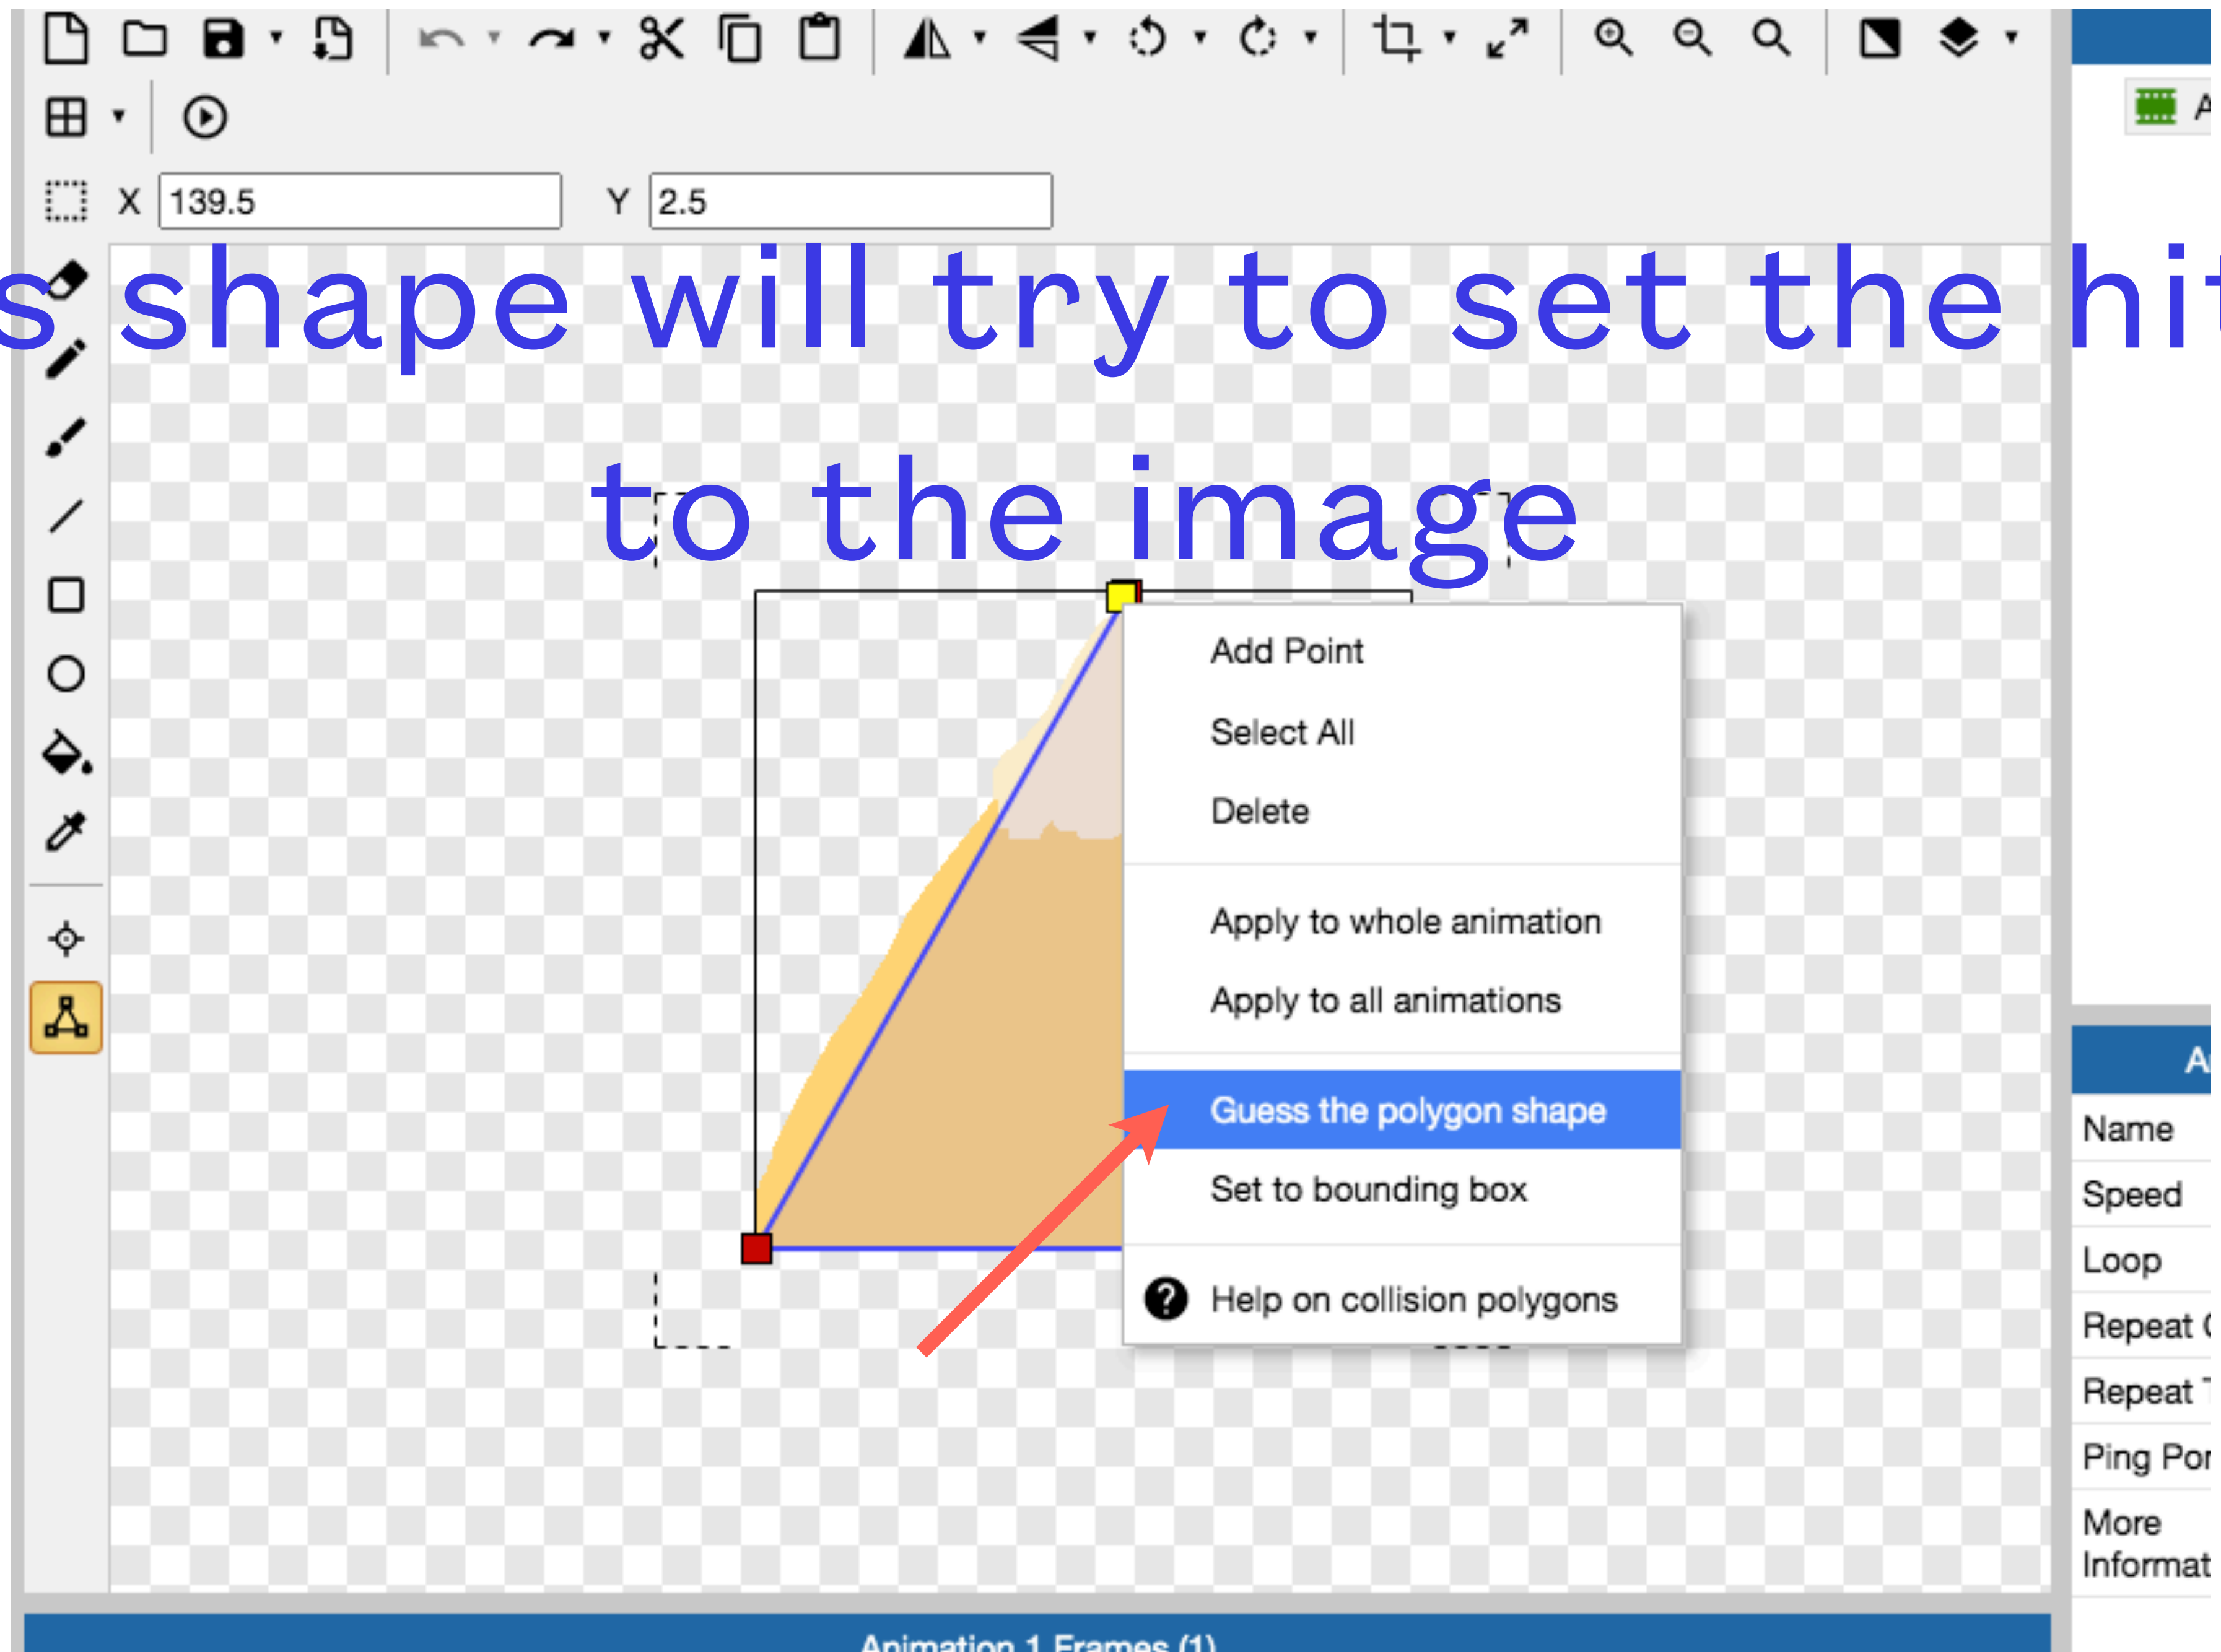

The screenshot shows the Cragworks game engine interface. The main workspace displays a scene with a yellow mountain, a stick figure, and an EXIT sign. A red arrow points from the text 'to change hitbox: double click sprite' to the mountain sprite. The interface includes a top menu bar with options like 'Menu', 'Buy now', 'Start page', 'Event sheet 1', 'red', 'Layout 5', 'Layout 3', and 'Layout 4'. The left sidebar shows a project tree with folders for 'mountain', 'fishtank', 'Effects', and 'View'. The right sidebar shows a 'Project' panel with a search bar and a list of objects including '8 direction example', 'Layouts', 'Event sheets', 'Scripts', and 'Object types'. The bottom panel shows a 'Tilemap' with a grid and various tools.

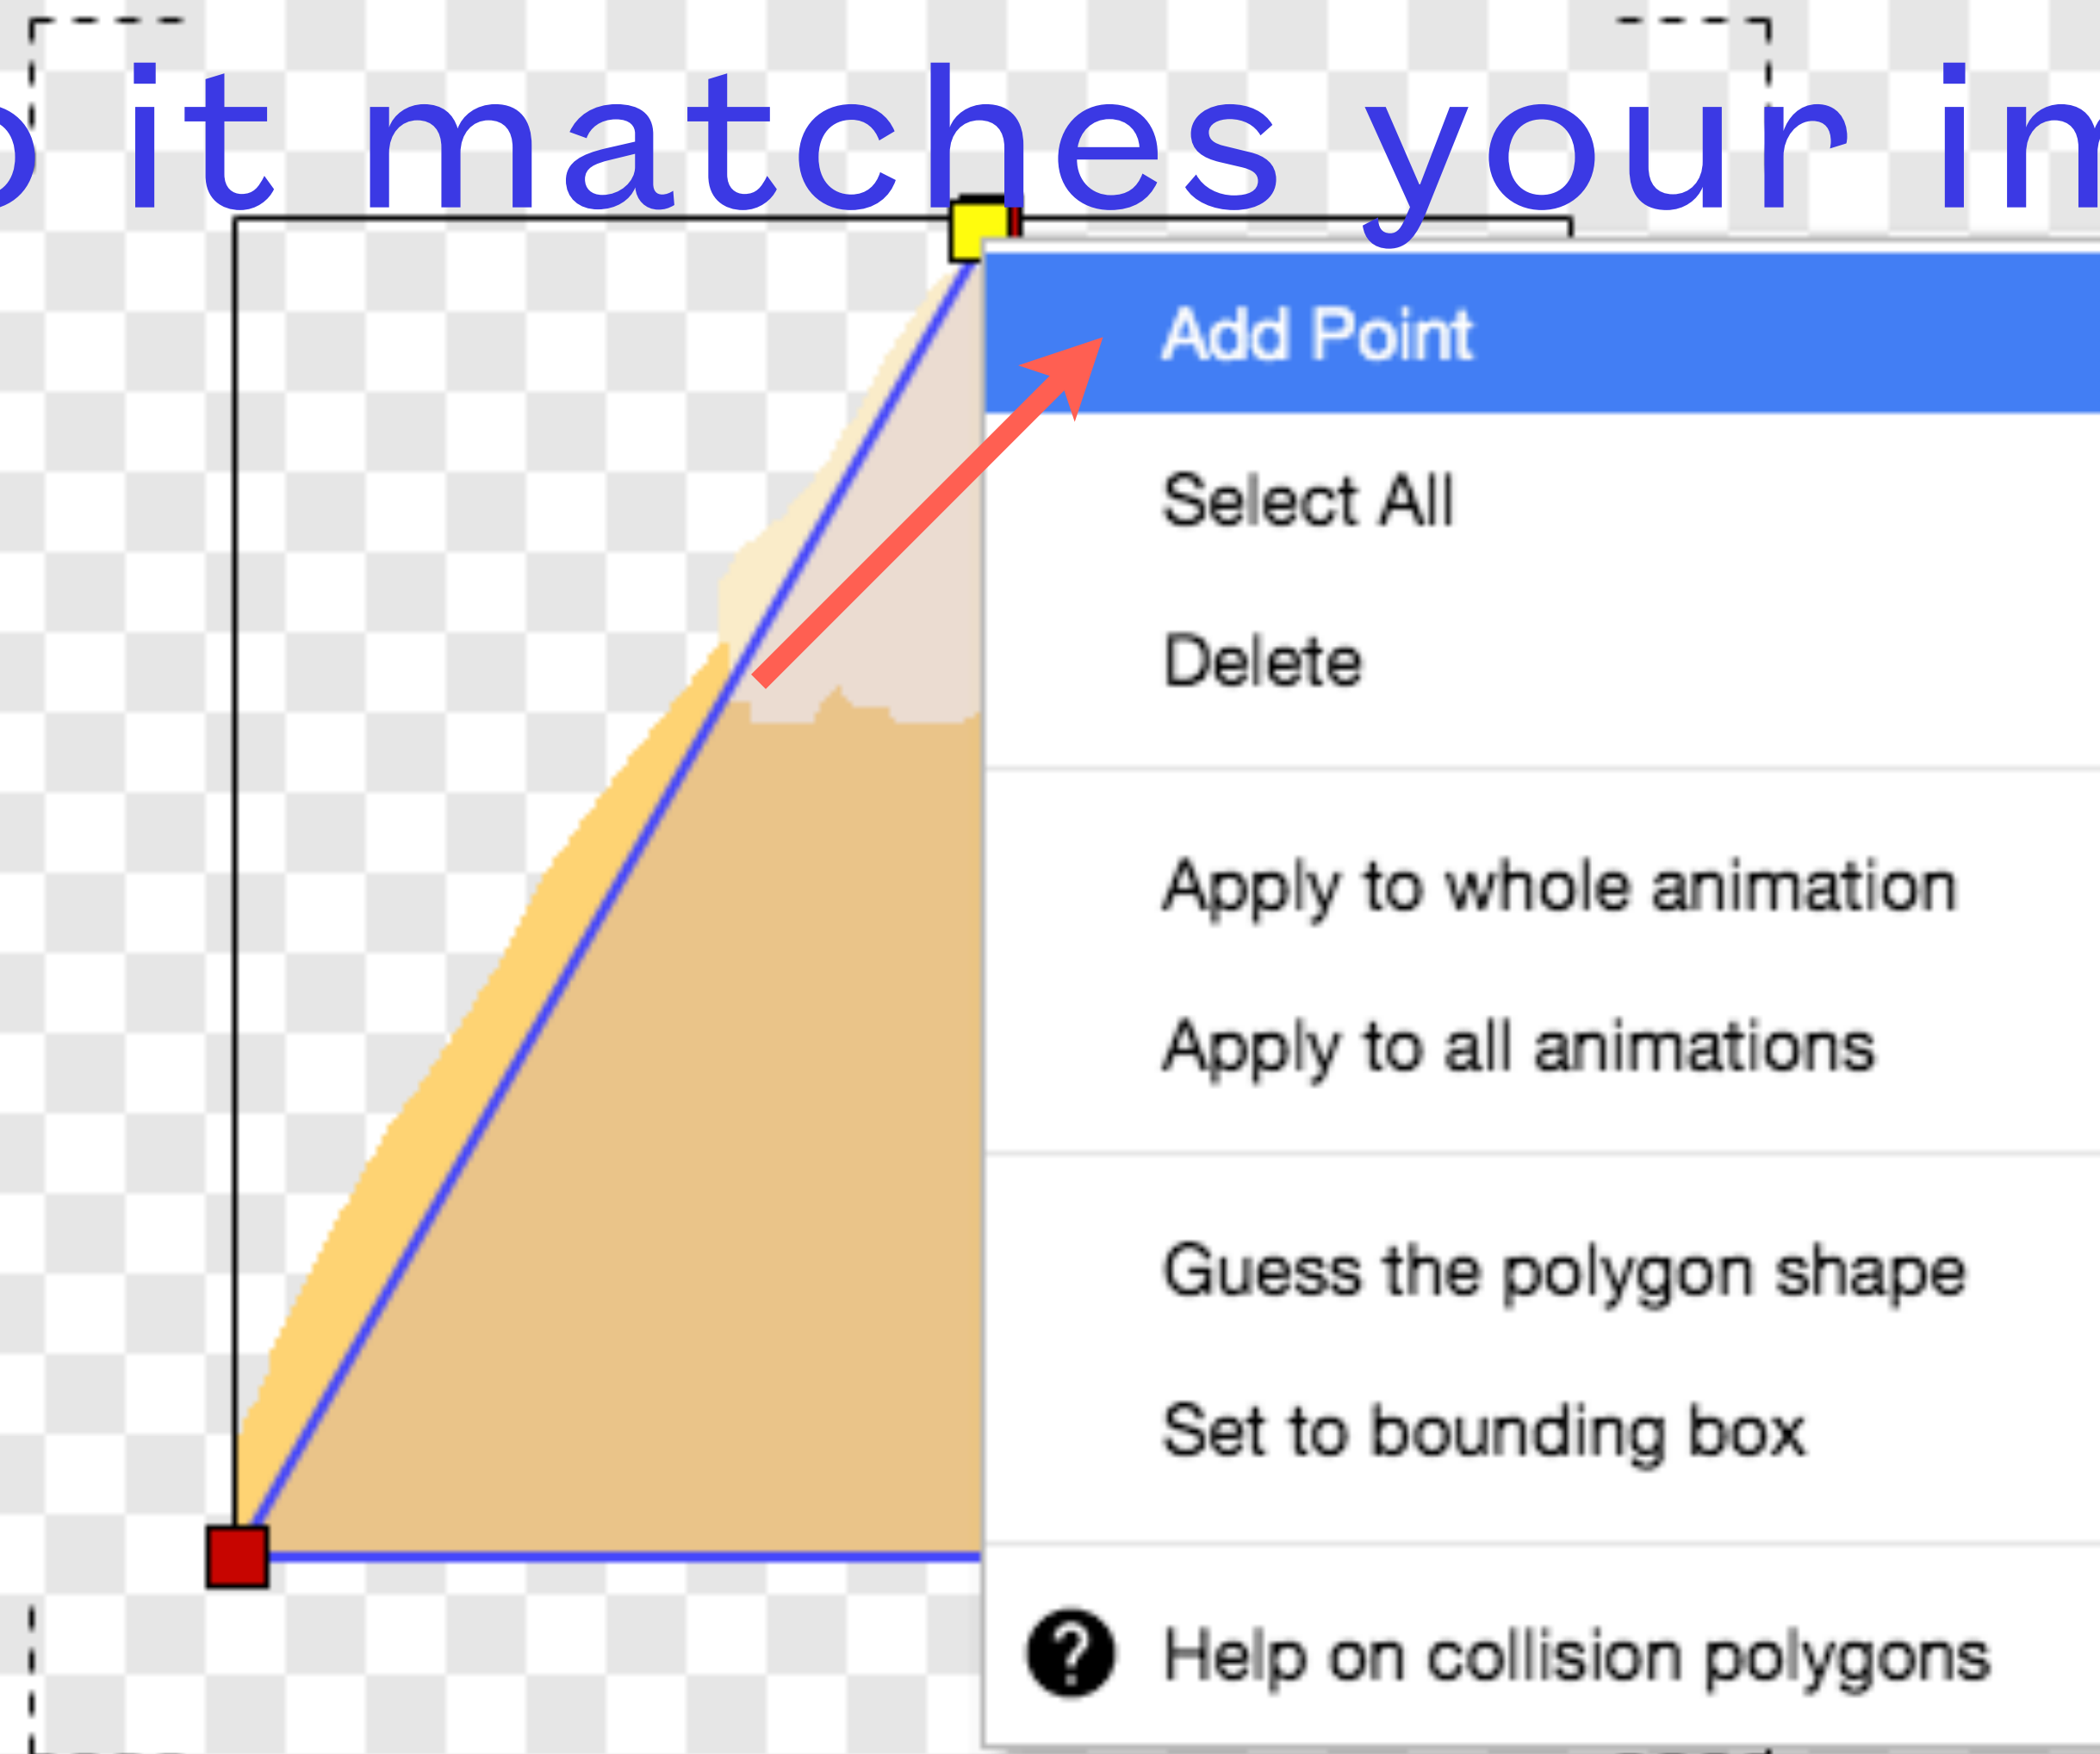

bounding box (hitbox) default is a
square
set to the image's complete size

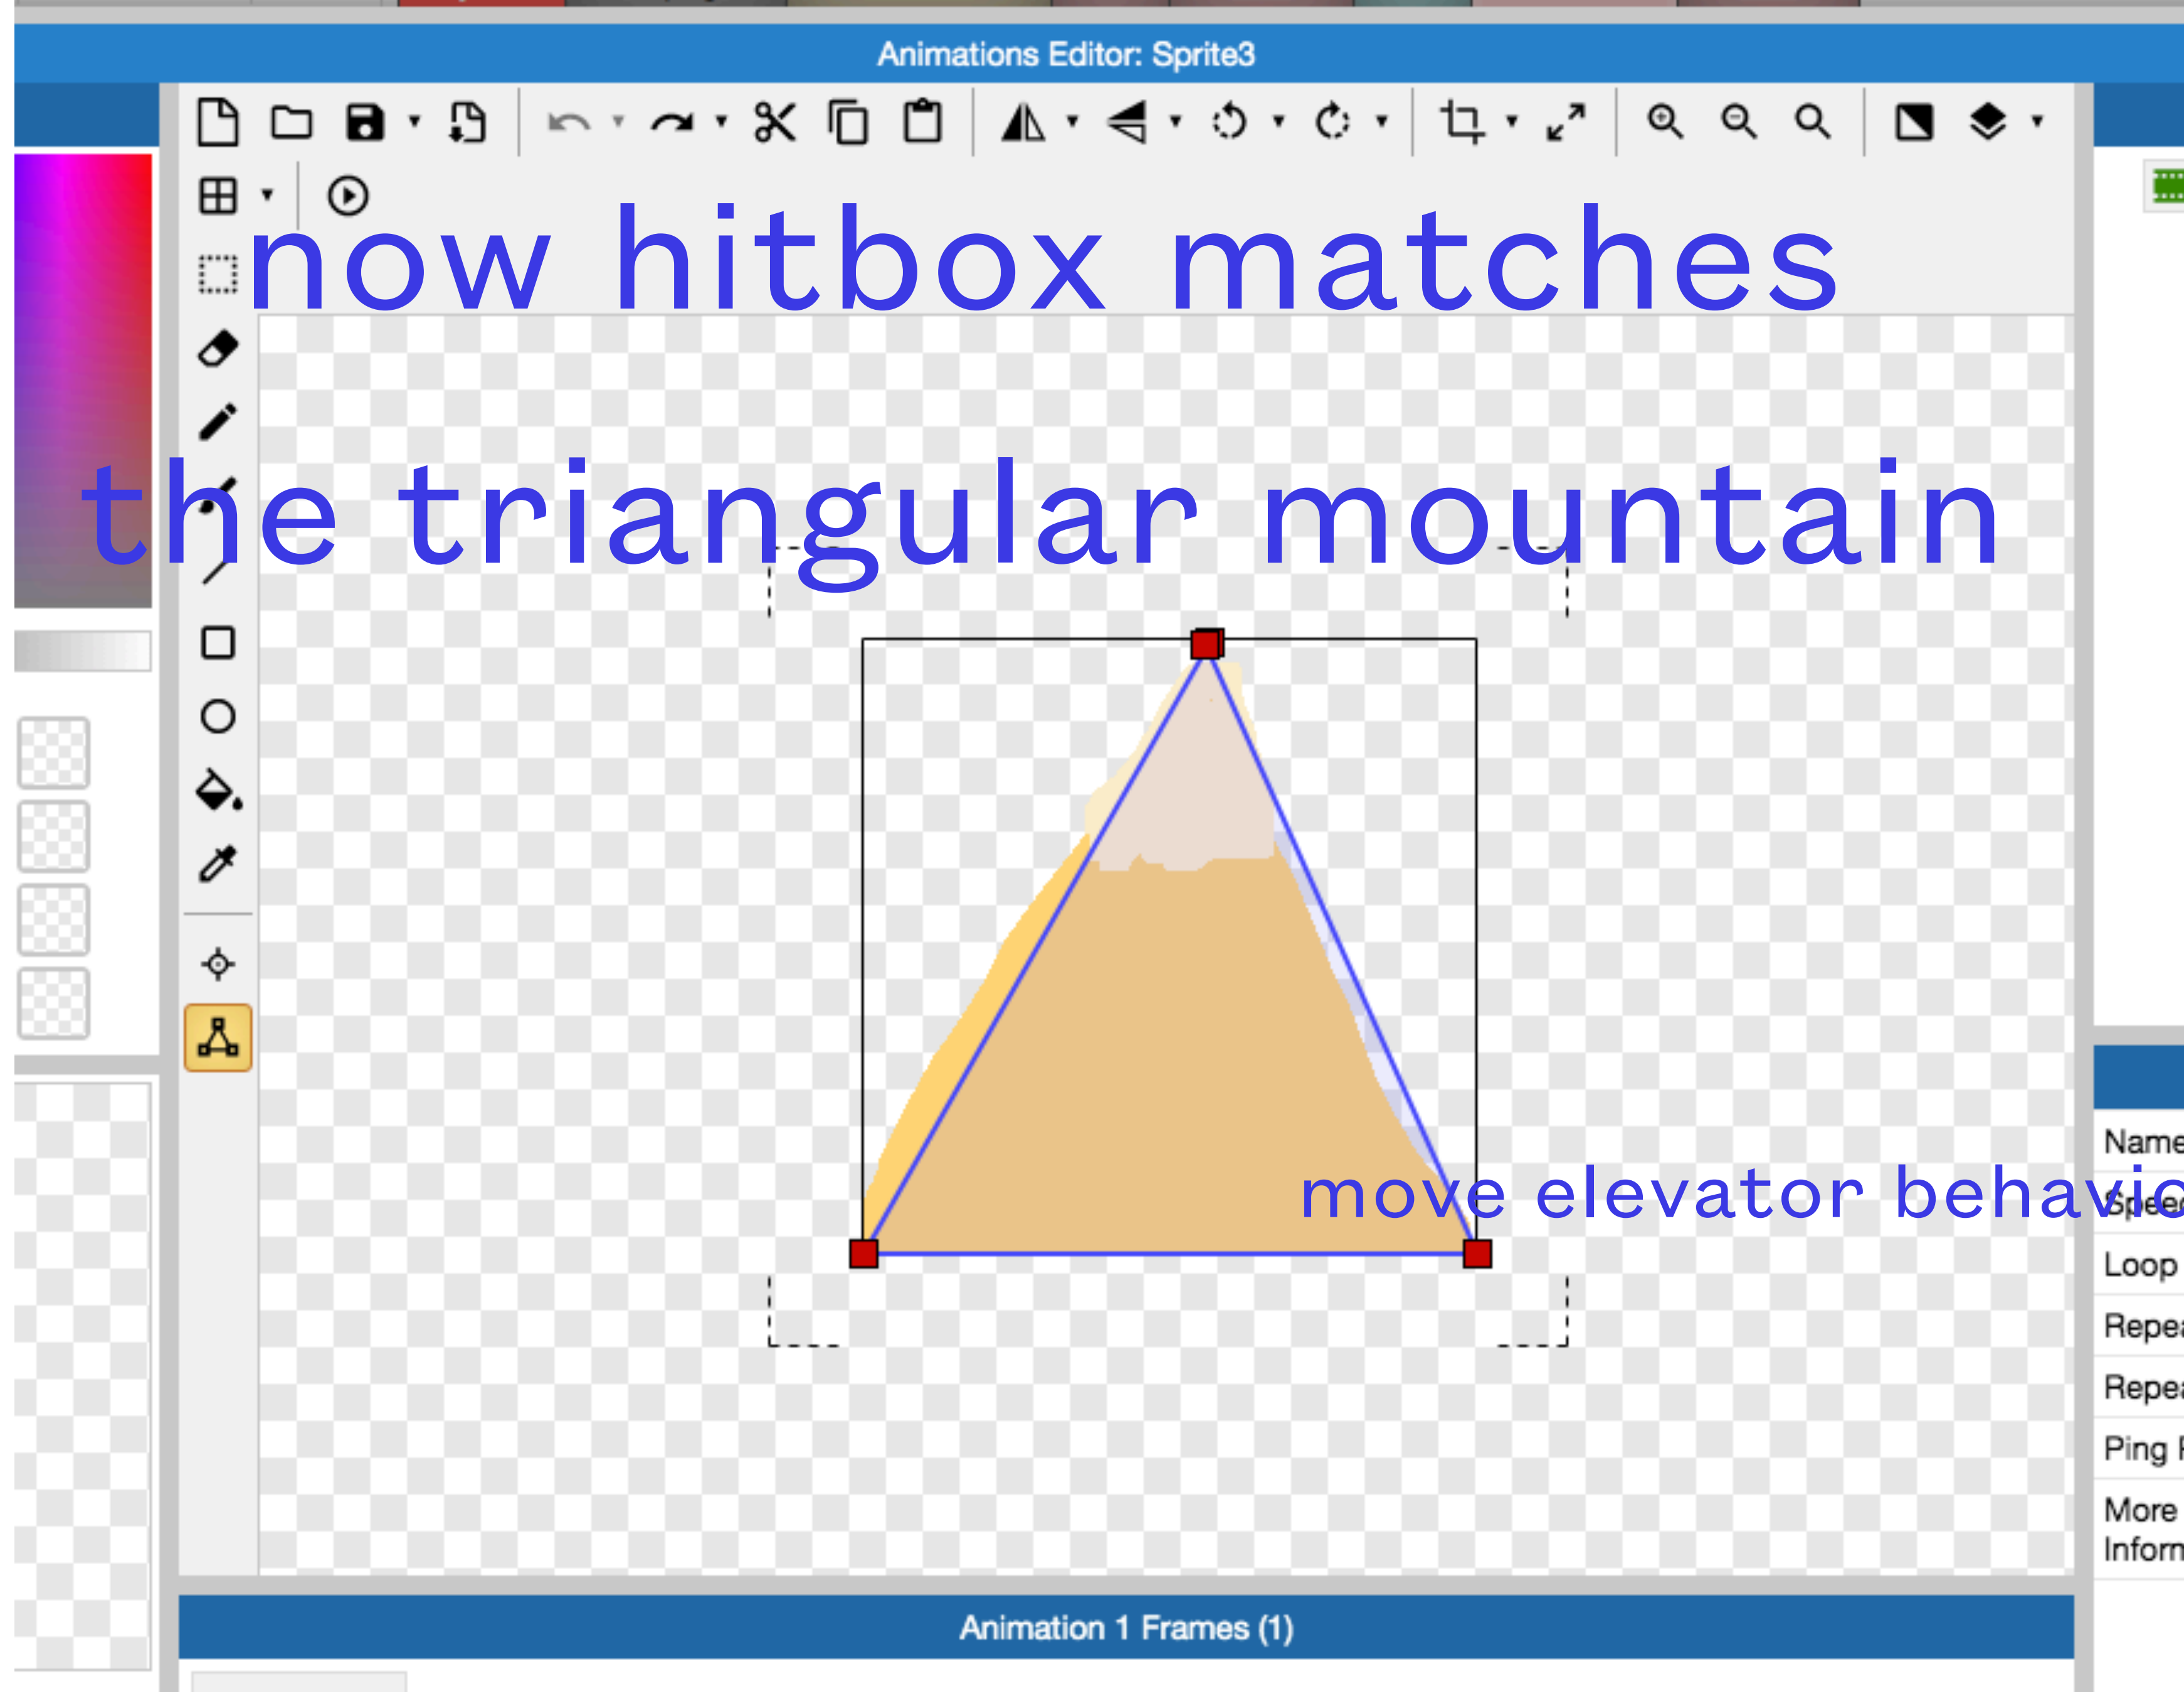

guess shape will try to set the hitbox
to the image

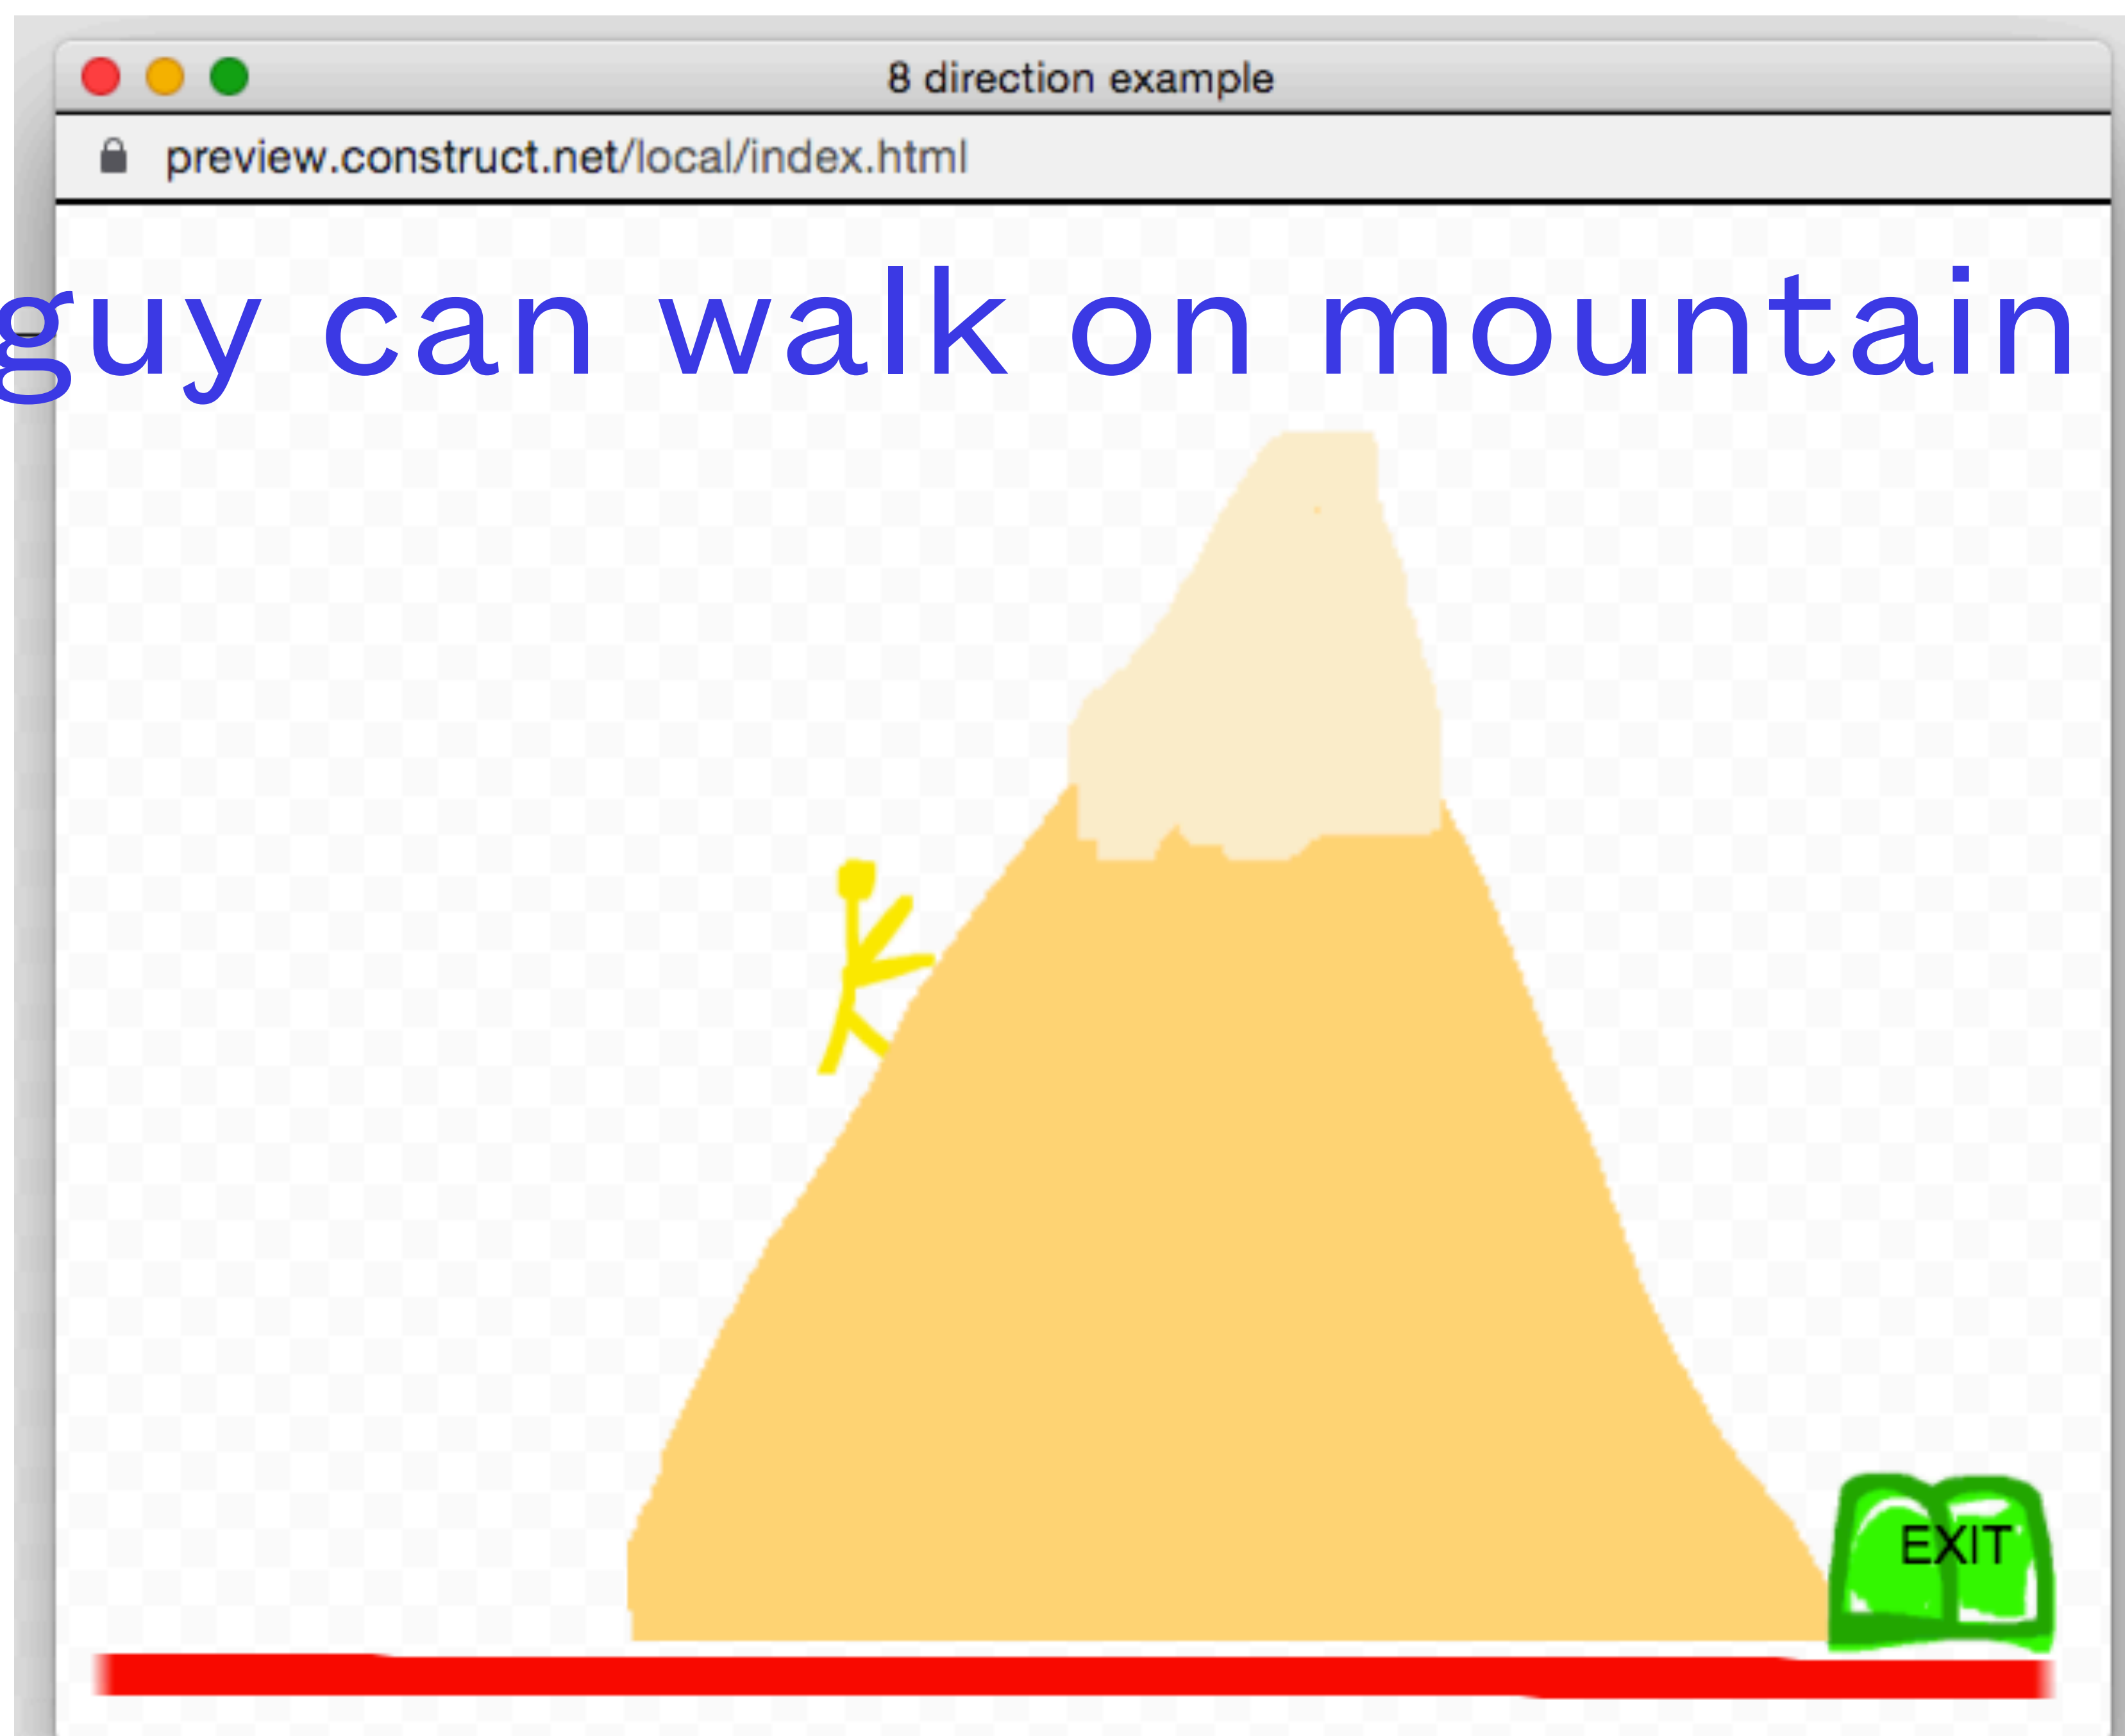

add more points and move the points
so it matches your image

move elevator behavior (move to)

guy can walk on mountain now

now can walk inside the water

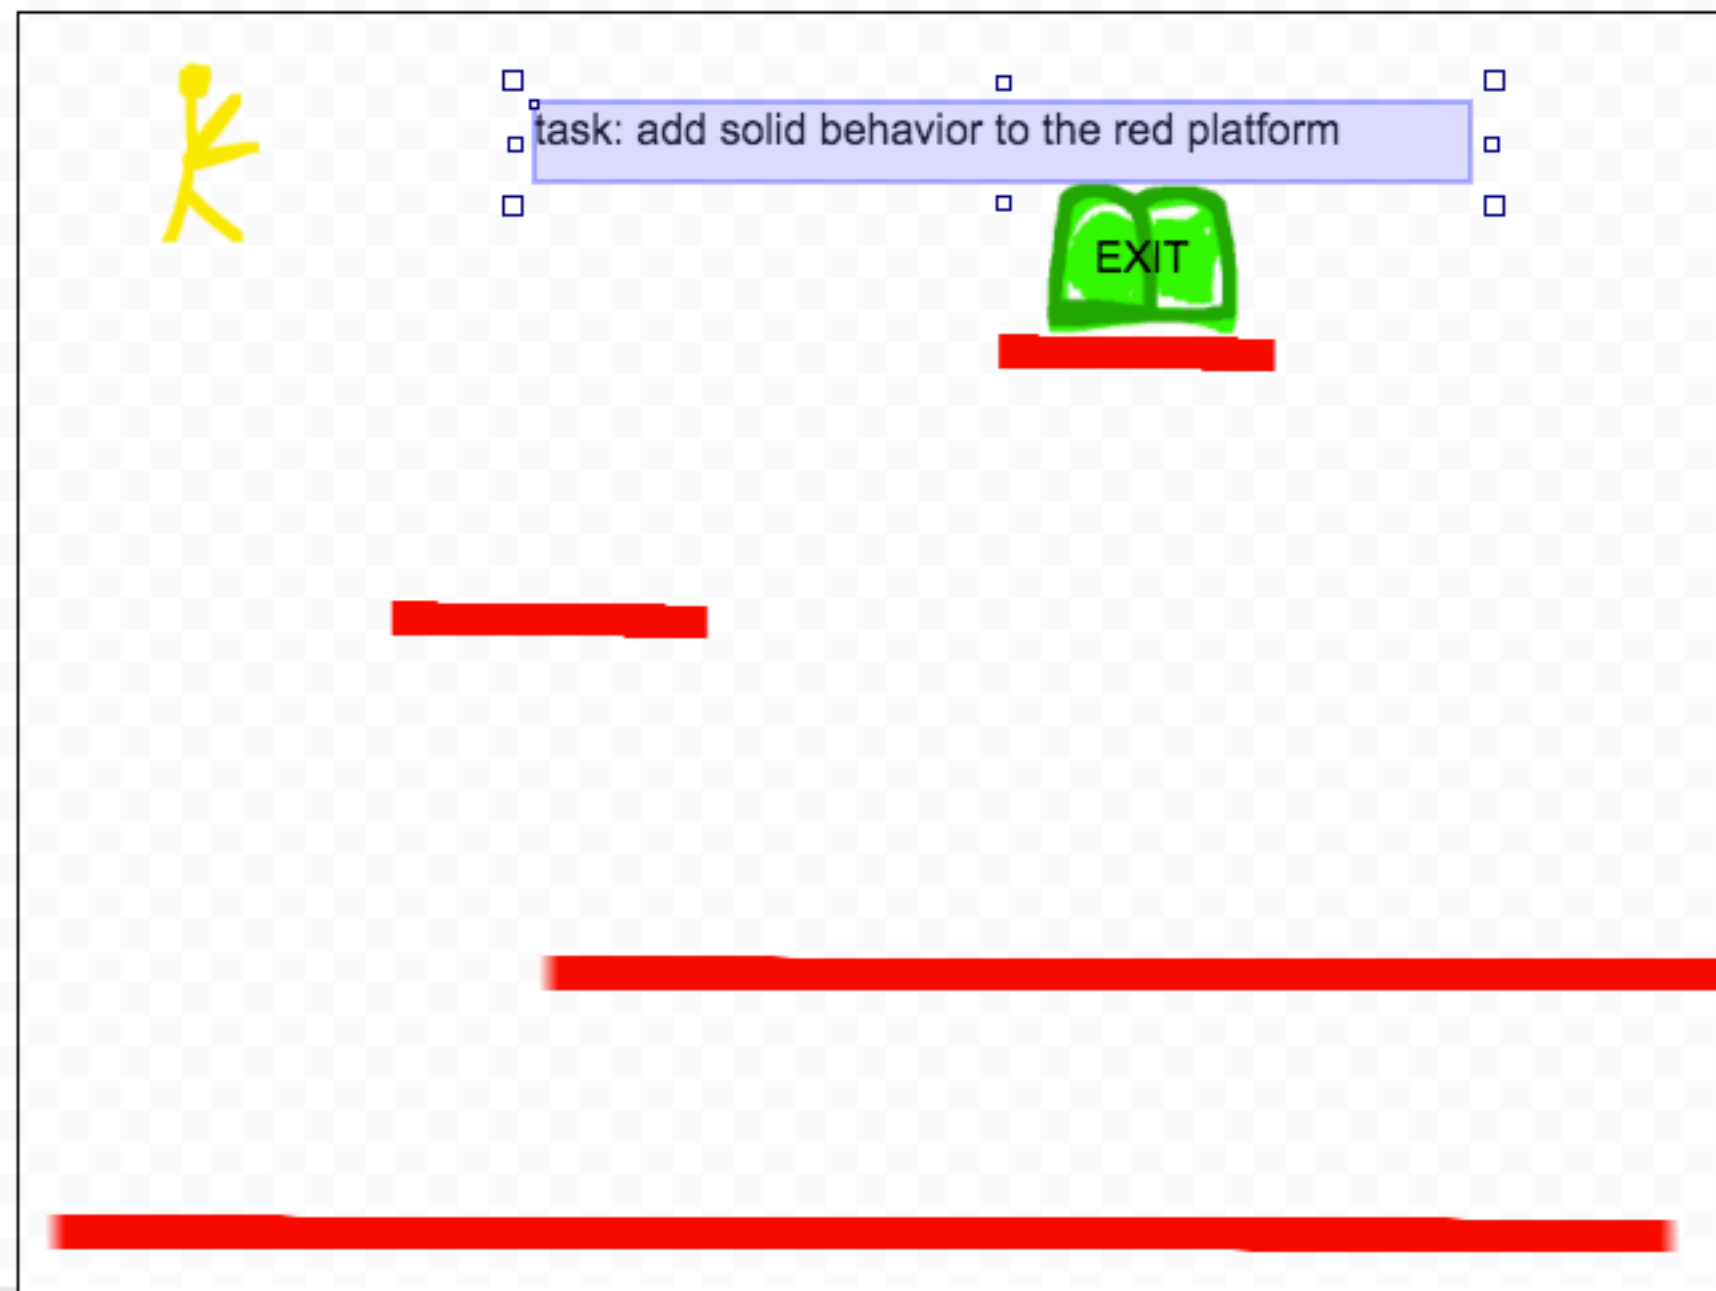

event sheet

Menu     Buy now Start page × Event sheet 1 × red × mountain × fishtank × win × Free edition

	guy			
1	 guy	✗ Is on-screen	 System	Restart layout
	 guy	Y > LayoutHeight	Add action	reset level if GUY goes outside window
2	→  guy	On collision with  Sprite	 System	Go to next layout
			Add action	if GUY touches the door

Add event

then go to the next layout = next level

open hitbox_task.c3p and complete tasks

- on your own: make a platformer with:

- 1 level: with box platform

red floating platform

- 1 level: a polygon shaped image with correct hitbox like mountain

yoshi standing on pentagon

- 1 level: another polygon shaped image with parts of image not in hitbox like fishtank

mario standing inside an image where the hitbox is inside the image
